INDEXES
Volume 227

AUTHOR INDEX

Volume 227

Transactions of the Metallurgical Society of AIME

In contrast to previous practice, separate Author and Subject Indexes are presented for this volume. The Author Index has been prepared on cards for sequential photography, in a form that shows complete paper citations under the name of each participating author, eliminating "See" references entirely. One of the purposes of this treatment is to provide for future cumulation. It is for this reason that the volume number appears with each citation. Citations are arranged under authors' names in chronological order of publication.

Aaron, H. B.

A Study of the Strain Fields Around Intersecting Slip Planes in LiF by X-Ray Extinction Contrast, H. B. Aaron—227, 797

Aaronson, H. I.

Discussion: On the Partition of Chromium between Austenite and Proeutectoid Ferrite (H. I. Aaronson, 224, 870), G. N. Maniar—227, 270

Abowitz, G.

Compressibility of Mercury Alloys, G. Abowitz and R. B. Gordon—227, 51

Abrahamson, E. P.

The Effect of Grain Size on the Brittle-Ductile Transition Temperature of Pure Iron and some Dilute Iron-Tungsten Alloys, F. G. Tahmoush, E. P. Abrahamson, II, and N. J. Grant—227 505

Achter, M. R.

Effect on Fatigue of Gaseous Environments under Varying Temperature and Pressure, M. R. Achter, G. J. Danek, Jr., and H. H. Smith—227, 1296

Adair, A. M.

The Occurrence and Partitioning of Impurity Phases in Recrystallized Chromium, R. E. Hook, H. J. Garrett, and A. M. Adair —227, 145

On the Recrystallization Embrittlement of Chromium, Rollin E. Hook and Attwell M. Adair—227, 151

Albright, D. L.

Anomalous Thermal Stability of Al-$CuAl_2$ Eutectic Specimens, R. W. Kraft, D. L. Albright, and J. A. Ford—227, 540

Crystallographic Substructure of Undercooled Nickel Specimens, D. L. Albright and G. A. Colligan—227, 1282

Alden, T. H.

Discussion: Effect of Superimposed Static Tension on the Fatigue Process in Copper Subjected to Alternating Torsion (W. A. Wood and H. M. Bendler, 224, 18), T. H. Alden—227, 263

The Strain Hardening of Magnesium Oxide Single Crystals, T. H. Alden—227, 1103

Allen, B. C.

The Effect of Impurities and Structure on the Tensile Transition Temperature of Chromium, B. C. Allen, D. J. Maykuth, and R. I. Jaffee—227, 724

The Surface Tension of Liquid Transition Metals at Their Melting Points, B. C. Allen—227, 1175

Allen, C. W.

Torsional Deformation of Aluminum and Magnesium Single Crystals, H. S. Choi, C. W. Allen, and B. D. Cullity—227, 331

Torsional Deformation of Iron Single Crystals, C. W. Allen and B. D. Cullity—227, 340

Alstetter, C.

Kinetics of the Initial Stage of Decomposition of Low *Ms* Iron-Nickel-Carbon Martensites, V. Kerlins and C. Altstetter—227, 94

Ansell, G. S.

The Influence of Gravity in Sintering, F. V. Lenel, H. H. Hausner, O. V. Roman, and G. S. Ansell—227, 640

The Strengthening Mechanism of Ferrous Martensite, G. S. Ansell and A. Arrott—227, 1080

Antonione, C.

Influence of Small Amounts of Carbon on Recovery and Recrystallization of High-Purity Iron, G. Venturello, C. Antonione, and F. Bonaccorso—227, 1433

Appleton, A. S.

The Energy Relations in the Deformation by Torsion of a Gold-Silver Alloy, A. S. Appleton and M. B. Bever—227, 365

Discussion: The Energy Relations in the Deformation by Torsion of a Gold-Silver Alloy (A. S. Appleton and M. B. Bever, 227, 365), G. W. Powell—227, 1477

Armstrong, W. M.

Interface Reactions Between Metals and Ceramics Part III: MgO-Fe Alloy System, W. M. Armstrong, A. C. D. Chaklader, and D. J. Rose—227, 1109

Arora, O. P.

Autocatalytic Acid Corrosion of Aluminum Containing Copper, M. Metzger and O. P. Arora—227, 1305

Arrott, A.

The Strengthening Mechanism of Ferrous Martensite, G. S. Ansell and A. Arrott—227, 1080

Aspden, R. G.

Source of (001) [100] Primaries in 3 Pct Si-Fe Alloys, R. G. Aspden—227, 905

Aukrust, Egil

Activities of Components in Oxide Solid Solutions: The Systems CoO-MgO, CoO-MnO, and CoO-"FeO" at 1200°C, Egil Aukrust and Arnulf Muan—227, 1378

Aust, K. T.

Grain Growth in Some Alnico Alloys, F. E. Luborsky and K. T. Aust—227, 791

Averbach, B. L.

Self-Diffusion in Alpha Iron During Compressive Plastic Flow, Ken-ichi Hirano, Morris Cohen, B. L. Averbach, and N. Ujiiye—227, 950

Avery, Donald H.

Cross Slip in Easy Glide, Donald H. Avery and Walter A. Backofen—227, 835

Backofen, Walter A.

Cross Slip in Easy Glide, Donald H. Avery and Walter A. Backofen—227, 835

Badiali, M. A.

Preparation of Ultra Pure Molybdenum, M. A. Badiali, N. W. Kirshenbaum, and R. Bakish—227, 32

Bakish, R.

Preparation of Ultra Pure Molybdenum, M. A. Badiali, N. W. Kirshenbaum, and R. Bakish—227, 32

Bardos, A. M.

The Effective Atomic Radius of Silicon in Ternary Laves Phase Alloys, A. M. Bardos, D. I. Bardos, and Paul A. Beck—227, 991

Bardos, D. I.

Ternary G and E Silicides and Germanides of Transition Elements, F. X. Spiegel, D. Bardos, and Paul A. Beck—227, 575

The Effective Atomic Radius of Silicon in Ternary Laves Phase Alloys, A. M. Bardos, D. I. Bardos, and Paul A. Beck—227, 991

Barmore, Willis L.

On the Thermally-Activated Mechanism of Prismatic Slip in the Silver-Aluminum Hexagonal Intermediate Phase, Eugenia M. Howard, Willis L. Barmore, Jim D. Mote and John E. Dorn 227, 1061

Barner, H. E.

Theoretical Analysis of Hydrogen Reduction of Hematite in a Fixed Bed, H. E. Barner, F. S. Manning, and W. O. Philbrook —227, 897

Barnett, D. M.

A Discussion of the Importance of Line Tension on Cottrell's Theory of the Sharp Yield Point, D. M. Barnett and J. M. Roberts—227, 658. Erratum—227, 1032

Bartholomew, Harry

Grain Delineation in Gold-Alloy Foil, Leonard Bernstein and Harry Bartholomew—227, 795

Bartlett, E. S.

Effect of O_2 and H_2 on the Mechanical Properties of Tantalum and Columbium at Low Temperatures, A. G. Imgram, E. S. Bartlett, and H. R. Ogden—227, 131

High-Temperature Solid-Solution-Strengthened Columbium Alloys, E. S. Bartlett, D. N. Williams, H. R. Ogden, R. I. Jaffee, and E. F. Bradley—227, 459

Tantalum Alloys—Some High- and Low-Temperature Properties, F. F. Schmidt, E. S. Bartlett, and H. R. Ogden—227, 856

The Solubility of Carbon in Tantalum, H. R. Ogden, F. F. Schmidt, and E. S. Bartlett—227, 1458

Bartlett, R. W.

The Oxidation Kinetics of Zirconium Carbide, R. W. Bartlett, M. E. Wadsworth, and I. B. Cutler—227, 467

Baschwitz, Robert

The Activity of Silicon in Liquid Fe-Si-C Alloys, John Chipman and Robert Baschwitz—227, 473

Bautista, Renato G.

Solvent Extraction of Transition Metals from Thiocyanate Solutions, Renato G. Bautista and Robert A. Hard—227, 124

Beardmore, P.

The Annealing Kinetics of an Explosively Loaded Gold-Silver Alloy, R. O. Scattergood, P. Beardmore, and M. B. Bever— 227, 1468

Beaudry, B. J.

The Scandium-Yttrium and Scandium-Zirconium System, B. J. Beaudry and A. H. Daane—227, 865

The Solid Solubility of Holmium in Copper, Silver, and Gold, W. J. Wunderlin, B. J. Beaudry, and A. H. Daane—227, 1302

Beck, Paul A.

Ternary G and E Silicides and Germanides of Transition Elements, F. X. Spiegel, D. Bardos, and Paul A. Beck—227, 575

The Effective Atomic Radius of Silicon in Ternary Laves Phase Alloys, A. M. Bardos, D. I. Bardos, and Paul A. Beck—227, 991

Beisler, J. F.

Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part I: Reaction Equilibria, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1258

Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part II: Reaction Kinetics of Silica Reduction, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1265

Belforti, D. A.

The Surface Tension of Copper by Optical Measurements, D. A. Belforti and M. P. Lepie—227, 80

Bendler, H. M.

Discussion: Effect of Superimposed Static Tension on the Fatigue Process in Copper Subjected to Alternating Torsion (W. A. Wood and H. M. Bendler, 224, 18), T. H. Alden—227, 263

Bernstein, Leonard

Grain Delineation in Gold-Alloy Foil, Leonard Bernstein and Harry Bartholomew—227, 795

Bever, M. B.

The Energy Relations in the Deformation by Torsion of a Gold-Silver Alloy, A. S. Appleton and M. B. Bever—227, 365

Annealing of the Ordered and Disordered Alloy Cu_3Au after Cold Work, B. Roessler, D. T. Novick, and M B. Bever—227, 985

The Annealing Kinetics of an Explosively Loaded Gold-Silver Alloy, R. O. Scattergood, P. Beardmore, and M. B. Bever— 227, 1468

Discussion: The Energy Relations in the Deformation by Torsion of a Gold-Silver Alloy (A. S. Appleton and M. B. Bever, 227, 365), G. W. Powell—227, 1477

Bevis, M.

Discussion: Mechanical Twinning in Fe-5 Wt Pct Be (R. H. Richman and G. P. Conard, II, 227, 779), A. G. Crocker and M. Bevis—227, 1471

Discussion: Plastic Deformation Modes in Fe-Ni-C Martensites (R. H. Richman, 227, 159), A. G. Crocker and M. Bevis —227, 1471

Bibby, M. J.

The Spurious Titanium Transformation, M. J. Bibby and J. Gordon Parr—227, 789

Biloni, H.

A Metallographic Study of Solute Segregation during Controlled Solidification in Tin-Lead Alloys, H. Biloni and G. F. Bolling— 227, 1351

Birchenall, C. Ernest

The Mechanism of Surface Self-Diffusion on Metals, C. Ernest Birchenall—227, 784

Blucher, J. T.

Influence of Molybdenum on the Mechanical Properties of Ni-Al_2O_3, K. M. Zwilsky, J. T. Blucher, and N. J. Grant—227, 1251

Bolling, G. F.

Preferred Orientations Developed During the Solidification of High-Purity Lead, G. F. Bolling, J. J. Kramer, and W. A. Tiller—227, 47

Solute Segregation During Cellular Solidification, J. J. Kramer, G. F. Bolling, and W. A. Tiller—227, 374

A Metallographic Study of Solute Segregation during Controlled Solidification in Tin-Lead Alloys, H. Biloni and G. F. Bolling— 227, 1351

Preferred Casting Orientations of High-Purity Zinc and Tin, G. F. Bolling, J. J. Kramer, and W. A. Tiller—227, 1453

Bonaccorso, F.

Influence of Small Amounts of Carbon on Recovery and Recrystallization of High-Purity Iron, G. Venturello, C. Antonione, and F. Bonaccorso—227, 1433

Bonfield, W.
The Effect of Surface Condition on the Microstrain of Beryllium, W. Bonfield, J. A. Sartell, and C. H. Li—227, 669
Borland, J. C.
Effect of the Shapes of Intergranular Liquid on the Hot Cracking of Welds and Castings, J. H. Rogerson and J. C. Borland—227, 2
Boulger, F. W.
Effects of Metallurgical Variables on Charpy and Drop-Weight Tests, F. W. Boulger and W. R. Hansen—227, 1212
Bradley, E. F.
High-Temperature Solid-Solution-Strengthened Columbium Alloys, E. S. Bartlett, D. N. Williams, H. R. Ogden, R. I. Jaffee, and E. F. Bradley—227, 459
Brigham, R. J.
The Interaction Parameter for Solutions of Carbon and Chromium in Austenite at 1000°C, R. J. Brigham and J. S. Kirkaldy—227, 538
Bronisz, S. E.
Transmission Electron Microscopy of Cold-Worked and Recrystallized Alpha Uranium, Dana L. Douglass and S. E. Bronisz—227, 1151
Brooks, Harvey
Binding in Metals, Harvey Brooks—227, 546
Brophy, J. H.
Nickel-Activated Sintering of Plasma-Sprayed Tungsten Deposits, J. H. Brophy, K. G. Kreider, and J. Wulff—227, 598
A Constitution Diagram for the Molybdenum-Iridium System, S. J. Michalik and J. H. Brophy—227, 1047
Some Modifications in the Diagram for the Tantalum-Zirconium System, L. F. Pease and J. H. Brophy—227, 1245
Brown, L. C.
The Interaction Parameter for Solutions of Carbon and Cobalt in Austenite at 1000°C, L. C. Brown and J. S. Kirkaldy—227, 1461
Buenneke, R. W.
X-Ray Line Broadening of Hardened and Cold Worked Steel, W. P. Evans and R. W. Buenneke—227, 447
Bullen, F. P.
The Cleavage of Zinc Single Crystals, F. P. Bullen—227, 1069
Burris, Leslie
Uranium Diffusivity in Liquid Cadmium, J. C. Hesson and Leslie Burris—227, 571
Buteau, L. G.
Determination of Alpha Zirconium $\{11\bar{2}1\}$ Twinning Elements Using Grain Boundary Rotations, R. E. Reed-Hill, W. A. Slippy, Jr., and L. G. Buteau—227, 976
Castleman, L. S.
Growth Kinetics of Beta-Brass Layers in Saturated Gamma-Brass vs Alpha-Brass Diffusion Couples, H. A. Froot and L. S. Castleman—227, 838
Ceresara, S.
On the Preprecipitation Process in Al-Mg Alloys, C. Panseri, T. Federighi, and S. Ceresara—227, 1122
Chaklader, A. C. D.
Interface Reactions Between Metals and Ceramics Part III: MgO-Fe Alloy System, W. M. Armstrong, A. C. D. Chaklader, and D. J. Rose—227, 1109
Chao, H. C.
The MnO-MnS Phase Diagram, H. C. Chao, Y. E. Smith, and L. H. Van Vlack—227, 796
Chasanov, M. G.
The Zinc-Vanadium Phase Diagram, M. G. Chasanov, R. Schablaske, P. D. Hunt, and B. Tani—227, 485
Chiotti, P.
Phase Diagram and Thermodynamic Properties of the Yttrium-Zinc System, P. Chiotti, J. T. Mason, and K. J. Gill—227, 910
Chiou, C.
Clustering Effects in Superconducting Aluminum-Zinc Alloys, C. Chiou and D. P. Seraphim—227, 1209
Chipman, John
Aluminum-Oxygen Interaction in Liquid Iron, J. C. d'Entremont, D. L. Guernsey, and John Chipman—227, 14
The Activity of Silicon in Liquid Fe-Si-C Alloys, John Chipman and Robert Baschwitz—227, 473
The Distribution of Silicon Between Fe-Si-C Alloys and SiO_2-CaO-MgO-Al_2O_3 Slags, Richard H. Rein and John Chipman—227, 1193
Choi, H. S.
Torsional Deformation of Aluminum and Magnesium Single Crystals, H. S. Choi, C. W. Allen, and B. D. Cullity—227, 331
Choi, Jei Y.
Anisotropy of the Surface Diffusion Coefficient for Copper, P. G. Shewmon and Jei Y. Choi—227, 515
Clark, J. B.
The Effect of Nonuniform Precipitation on the Fatigue Properties of an Age Hardening Alloy, A. J. McEvily, R. L. Snyder, and J. B. Clark—227, 452
Evidence for Reversion During Cyclic Loading of an Aluminum Alloy, A. J. McEvily, Jr., J. B. Clark, E. C. Utley, and W. H. Herrnstein, III—227, 1093
Conventions for Plotting the Diffusion Paths in Multiphase Ternary Diffusion Couples on the Isothermal Section of a Ternary Phase Diagram, J. B. Clark—227, 1250
Cohen, Morris
Stabilization of Austenite by Cyclic Martensitic Transformations, George Krauss, Jr. and Morris Cohen—227, 278
Self-Diffusion in Alpha Iron During Compressive Plastic Flow, Ken-ichi Hirano, Morris Cohen, B. L. Averbach, and N. Ujiiye—227, 950
Colligan, G. A.
Crystallographic Substructure of Undercooled Nickel Specimens, D. L. Albright and G. A. Colligan—227, 1282
Conard, G. P., II
Mechanical Twinning in Fe-5 Wt Pct Be, R. H. Richman and G. P. Conard, II—227, 779
Discussion: Mechanical Twinning in Fe-5 Wt Pct Be (R. H. Richman and G. P. Conard, II, 227, 779), A. G. Crocker and M. Bevis—227, 1471
The Thermoelectric Properties of Some Transition Thermoelements in Common Use, D. D. Pollock and G. P. Conard, II—227, 478
Conrad, H.
Fracture and Twinning in Sapphire (Alpha-Al_2O_3 Crystals), E. Stofel and H. Conrad—227, 1053
Coucoulas, A.
Some Observations on the Microstructure and Fragmentation of Solid Carbon Dioxide, A. Coucoulas and E. Gregory—227, 1134
Cox, B.
The Oxidation and Corrosion of Niobium (Columbium), B. Cox and T. Johnston—227, 36
Craig, R. S.
Order-Disorder Transformation in Cd-Rich Mg-Cd Alloys, G. S. Kamath, R. S. Craig, and W. E. Wallace—227, 26
Croach, J. W.
Predicting Physical Properties in Oriented Metals, E. F. Stucken and J. W. Croach—227, 934

Crocker, A. G.

Discussion: Mechanical Twinning in Fe-5 Wt Pct Be (R. H. Richman and G. P. Conard, II, 227, 779), A. G. Crocker and M. Bevis—227, 1471

Discussion: Plastic Deformation Modes in Fe-Ni-C Martensites (R. H. Richman, 227, 159), A. G. Crocker and M. Bevis —227, 1471

Cullity, B. D.

Torsional Deformation of Aluminum and Magnesium Single Crystals, H. S. Choi, C. W. Allen, and B. D. Cullity—227, 331

Torsional Deformation of Iron Single Crystals, C. W. Allen and B. D. Cullity—227, 340

Residual Stress After Plastic Elongation and Magnetic Losses in Silicon Steel, B. D. Cullity—227, 356

Magnetostriction and Residual Stress in Nickel after Plastic Elongation, B. D. Cullity and O. P. Puri—227, 359

Cunningham, G. W.

Interfacial Voids in Pressure Bonded Copper, G. W. Cunningham and J. W. Spretnak—227, 7

Cutler, I. B.

The Oxidation Kinetics of Zirconium Carbide, R. W. Bartlett, M. E. Wadsworth, and I. B. Cutler—227, 467

Daane, A. H.

The Scandium-Yttrium and Scandium-Zirconium System, B. J. Beaudry and A. H. Daane—227, 865

The Solid Solubility of Holmium in Copper, Silver, and Gold, W. J. Wunderlin, B. J. Beaudry, and A. H. Daane—227, 1302

Damiano, V. V.

The Double Tetrahedron—A Method of Notation for Cph Structures, Victor V. Damiano—227, 788

Three Dimensional Aspects of Dislocations and Substructures in Bulk Zinc Crystals, V. V. Damiano, G. S. Tint, and M. Herman—227, 994

Dancy, Edna A.

Electrical Conductivity of the Molten Co-S, Ni-S, Cu-S, and Ag-S Systems, Edna A. Dancy and Gerhard J. Derge—227, 1034

Danek, G. J., Jr.

Effect on Fatigue of Gaseous Environments under Varying Temperature and Pressure, M. R. Achter, G. J. Danek, Jr., and H. H. Smith—227, 1296

D'Antonio, Carmine

The Strength of Vapor-Deposited Nickel Films, Carmine D'Antonio, Joel Hirschhorn, and Lemuel Tarshis—227, 1346

Darby, J. B., Jr.

The Rate of Solution of Some Transition Elements in Liquid Aluminum, J. B. Darby, Jr., D. B. Jugle, and O. J. Kleppa—227, 179

Intermediate Phases in the Tantalum-Palladium System, J. B. Darby, Jr., J. W. Downey, and L. J. Norton—227, 1028

The CsCl-Type Ordered Structure in VMn, J. B. Darby, Jr.—227, 1460

Davidson, T. E.

Some Observations on the Effects of Hydrostatic Pressures to 20,000 Atm on the Structure of Polycrystalline Bismuth, T. E. Davidson and C. G. Homan—227, 167

Davies, R. G.

Steady State Creep in Iron—15 to 20 At. Pct Aluminum Alloys R. G. Davies—227, 22

Steady State Creep in a Ni_3Fe Alloy, R. G. Davies—227, 277

Steady-State Creep in Fe-2 to 11 At. Pct Si Alloys, R. G. Davies —227, 665

Davis, K. G.

Plastic Deformation in Cobalt Crystals, K. G. Davis and E. Teghtsoonian—227, 762

Dealy, John M.

Interaction Parameters in Dilute Molten Alloys, John M. Dealy and Robert D. Pehlke—227, 88

Activity Coefficients in Binary Liquid Metallic Solutions at Infinite Dilution, John M. Dealy and Robert D. Pehlke—227, 1030

Deardorff, D. K.

Discussion: The Constitution Diagram Tungsten-Hafnium (Bill C. Giessen, Irmgard Rump, and Nicholas J. Grant, 224, 60), D. K. Deardorff and Haruo Kato—227, 264

Derge, Gerhard J.

Electrical Conductivity of the Molten Co-S, Ni-S, Cu-S, and Ag-S Systems, Edna A. Dancy and Gerhard J. Derge—227, 1034

Dewing, E. W.

The Reaction of Sodium with Nongraphitic Carbon: Reactions Occurring in the Linings of Aluminum Reduction Cells, E. W. Dewing—227, 1328

Donaldson, D. M.

Reprocessing Fast Reactor Fuels at Dounreay, D. M. Donaldson, K. Hartley, P. Lees, and N. Parkinson—227, 191

Dorn, John E.

On the Nature of Strain Hardening in Polycrystalline Aluminum and Aluminum-Magnesium Alloys, Sandip K. Mitra and John E. Dorn—227, 1015

On the Thermally-Activated Mechanism of Prismatic Slip in the Silver-Aluminum Hexagonal Intermediate Phase, Eugenia M. Howard, Willis L. Barmore, Jim D. Mote and John E. Dorn 227, 1061

Effect of Stress and Recovery on the Creep of High-Purity Polycrystalline Aluminum at Intermediate Temperatures, N. Jaffe and J. E. Dorn—227, 1314

Douglass, Dana L.

Transmission Electron Microscopy of Cold-Worked and Recrystallized Alpha Uranium, Dana L. Douglass and S. E. Bronisz—227, 1151

Downey, J. W.

Intermediate Phases in the Tantalum-Palladium System, J. B. Darby, Jr., J. W. Downey, and L. J. Norton—227, 1028

Ternary Cr_3O-Type Phases with Vanadium, S. T. Zegler and J. W. Downey—227, 1407

Drew, J. B.

Measurements of Surface Diffusion Coefficients on Silver Single Crystals, J. B. Drew and J. J. Pye—227, 99

Dunn, C. G.

On an Effect of Silicon on Recrystallization Textures in Cold-Rolled High-Purity Iron-Silicon Alloys, C. G. Dunn—227, 1011

Duwez, Pol

Rapid Quenching of Liquid Alloys, Pol Duwez and R. H. Willens —227, 362

Dyson, Brian F.

The Surface Tension of Iron and Some Iron Alloys, Brian F. Dyson—227, 1098

Elias, J. A.

Discussion: Plastic Anisotropy of Cold Rolled-Annealed Low-Carbon Steel Related to Crystallographic Orientation (J. A. Elias, R. H. Heyer, and J. H. Smith, 224, 678), W. F. Hosford —227, 272. Erratum—227, 800

Elliott, J. F.

The Solubility of Hydrogen in Liquid Pure Metals Co, Cr, Cu, and Ni, M. Weinstein and J. F. Elliott—227, 285. Erratum—227, 800

Solubility of Hydrogen in Liquid Iron Alloys, Martin Weinstein and John F. Elliott—227, 382

Carbon Content of Graphite-Saturated Fe-Si-Mn Alloys, 1400° to 1650°C, O. Skiredj and J. F. Elliott—227, 536

Some Problems in Macroscopic Transport, John F. Elliott—227, 802

Solubility of Nitrogen in Liquid Iron Alloys II. Kinetics, Robert D. Pehlke and John F. Elliott—227, 844

Ells, C. E.

The Agglomeration of Hydrogen in Aluminum, C. E. Ells and W. Evans—227, 438

El-Mehairy, A. E.

A New Technique for Determination of Density of Liquid Metals: Application to Copper, A. E. El-Mehairy and R. G. Ward—227, 1226

Enterline, S. M.

Amax Zinc Refiner, S. M. Enterline and J. F. Pierce, Sr.—227, 509

d'Entremont, J. C.

Aluminum-Oxygen Interaction in Liquid Iron, J. C. d'Entremont, D. L. Guernsey, and John Chipman—227, 14

Optical Temperature Measurements for Liquid Iron, John C. d'Entremont—227, 482

Evans, W.

The Agglomeration of Hydrogen in Aluminum, C. E. Ells and W. Evans—227, 438

Evans, W. P.

X-Ray Line Broadening of Hardened and Cold Worked Steel, W. P. Evans and R. W. Buenneke—227, 447

Faller, J. G.

Atomic Arrangements in the C14 Laves Phase $Zr(VCo)_2$, J. G. Faller and L. P. Skolnick—227, 687

Farrar, P. A.

Thermodynamic Properties and Lattice Parameters of Hafnium-Oxygen Alloys, M. D. Silver, P. A. Farrar, and K. L. Komarek—227, 876

A Reinvestigation of the Chromium-Rich Region of the Titanium-Chromium System, Paul A. Farrar and Harold Margolin—227, 1342

Federer, J. I.

Diffusion of Zr^{95} and Cb^{95} in Bcc Zirconium, J. I. Federer and T. S. Lundy—227, 592

Federighi, T.

On the Preprecipitation Process in Al-Mg Alloys, C. Panseri, T. Federighi, and S. Ceresara—227, 1122

Feltner, C. E.

Cyclic Stress-Induced Ductility in Cadmium, C. E. Feltner—227, 798

Ferguson, William H., Jr.

The Constitution Diagram Tantalum-Iridium, William H. Ferguson, Jr., Bill C. Giessen, and Nicholas J. Grant—227, 1401

Ferriss, D. P.

Discussion: The Dependence of Yield Stress on Grain Size for Tantalum and a 10 Pct W-90 Pct Ta Alloy (C. S. Tedmon and D. P. Ferriss, 224, 1079), R. E. Smallman—227, 772

Fiedler, H. C.

The Use of Vanadium Nitride Inclusions for the Development of Cube-on-edge Texture in Thin Gage Silicon-Iron, H. C. Fiedler—227, 776

Flood, H.

The Application of the Mass Action Law to Metal-Slag Equilibria, H. Flood and J. M. Toguri—227, 525

Ford, J. A.

Anomalous Thermal Stability of $Al-CuAl_2$ Eutectic Specimens, R. W. Kraft, D. L. Albright, and J. A. Ford—227, 540

Forward, F.

Aqueous Oxidation of Galena in Acid Media under Pressure, A. Vizsolyi, H. Veltman, and F. Forward—227, 215

Foster, K.

Growth Rates of Surface Energy Controlled Secondary Grains in 3 Pct Si-Fe Sheets, K. Foster, J. J. Kramer, and G. W. Wiener—227, 185

Foster, P. K.

A New Analysis of the Diffusion of Hydrogen in Iron and Ferritic Steels, A. McNabb and P. K. Foster—227, 618

Fowler, C. M.

The Behavior of Iron-Silicon Alloys Under Impulsive Loading, E. G. Zukas, C. M. Fowler, F. S. Minshall, and J. O'Rourke—227, 746

Froot, H. A.

Growth Kinetics of Beta-Brass Layers in Saturated Gamma-Brass vs Alpha-Brass Diffusion Couples, H. A. Froot and L. S. Castleman—227, 838

Fujishiro, S.

Thermodynamic Properties of Mn_7C_3, N. A. Gokcen and S. Fujishiro—227, 542

Fuller, W. C.

Preparation of Beryllium Thin Films, G. P. Walters and W. C. Fuller—227, 1462

Fulton, J. C.

A Thermodynamic Model for the Deoxidation of Alloy Steels, R. A. Walsh, S. Ramachandran, and J. C. Fulton—227, 1380

Garofalo, F.

An Empirical Relation Defining the Stress Dependence of Minimum Creep Rate in Metals, F. Garofalo—227, 351

Discussion: An Empirical Relation Defining the Stress Dependence of Minimum Creep Rate in Metals (F. Garofalo, 227, 351), James C. M. Li, J. Weertman—227, 1474

Garrett, H. J.

The Occurrence and Partitioning of Impurity Phases in Recrystallized Chromium, R. E. Hook, H. J. Garrett, and A. M. Adair—227, 145

Gauvin, W. H.

A Generalized Rate Equation for the Reduction of Iron Oxides, N. J. Themelis and W. H. Gauvin—227, 290

Gensamer, M.

Deformation and Fracture of Polycrystalline Cadmium, N. S. Stoloff and M. Gensamer—227, 70

Giessen, Bill C.

Discussion: The Constitution Diagram Tungsten-Hafnium (Bill C. Giessen, Irmgard Rump, and Nicholas J. Grant, 224, 60), D. K. Deardorff and Haruo Kato—227, 264

An X-Ray Method to Determine the Liquidus in High-Temperature Binary Phase Diagrams, Bill C. Giessen and Nicholas J. Grant—227, 535

The Constitution Diagram Tantalum-Iridium, William H. Ferguson, Jr., Bill C. Giessen, and Nicholas J. Grant—227, 1401

Gifkins, R. C.

Discussion: Grain Boundary Sliding During Creep of an Aluminum-2 Pct Magnesium Alloy (A. W. Mullendore and Nicholas J. Grant, 227, 319), A. Gittins and R. C. Gifkins—227, 1472

Gill, K. J.

Phase Diagram and Thermodynamic Properties of the Yttrium-Zinc System, P. Chiotti, J. T. Mason, and K. J. Gill—227, 910

Gittins, A.

Discussion: Grain Boundary Sliding During Creep of an Aluminum-2 Pct Magnesium Alloy (A. W. Mullendore and Nicholas J. Grant, 227, 319), A. Gittins and R. C. Gifkins—227, 1472

Gokcen, N. A.

Thermodynamic Properties of Mn_7C_3, N. A. Gokcen and S. Fujishiro—227, 542

Goodenow, R. H.
Growth Kinetics and the Mechanism of the Bainite Transformation, R. H. Goodenow, S. J. Matas, and R. F. Hehemann—227, 651
Goodman, S. R.
Texture Transition in Copper, Hsun Hu and S. R. Goodman—227, 627
Cube Texture in Austenitic Stainless Steel, Hsun Hu and S. R. Goodman—227, 1454
Gordon, Paul
Discussion: The Mechanism of Boundary Migration in Recrystallization (Paul Gordon and R. A. Vandermeer, 224, 917), W. C. Leslie—227, 768
A Rationalization of the Data on Grain Boundary Migration in Zone-Refined Metals as Influenced by Dissolved Impurities, Paul Gordon—227, 699
Gordon, R. B.
Compressibility of Mercury Alloys, G. Abowitz and R. B. Gordon—227, 51
Grant, Nicholas J.
Discussion: The Constitution Diagram Tungsten-Hafnium (Bill C. Giessen, Irmgard Rump, and Nicholas J. Grant, 224, 60), D. K. Deardorff and Haruo Kato—227, 264
Grain Boundary Sliding During Creep of an Aluminum - 2 Pct Magnesium Alloy, A. W. Mullendore and Nicholas J. Grant—227, 319
The Effect of Grain Size on the Brittle-Ductile Transition Temperature of Pure Iron and some Dilute Iron-Tungsten Alloys, F. G. Tahmoush, E. P. Abrahamson, II, and N. J. Grant—227 505
An X-Ray Method to Determine the Liquidus in High-Temperature Binary Phase Diagrams, Bill C. Giessen and Nicholas J. Grant—227, 535
The Effect of Prior Strain and Polygonization on the Creep-Rupture Properties of Nickel, W. Michael Yim and Nicholas J. Grant—227, 868
Influence of Molybdenum on the Mechanical Properties of Ni-Al_2O_3, K. M. Zwilsky, J. T. Blucher, and N. J. Grant—227, 1251
The Constitution Diagram Tantalum-Iridium, William H. Ferguson, Jr., Bill C. Giessen, and Nicholas J. Grant—227, 1401
Discussion: Grain Boundary Sliding During Creep of an Aluminum-2 Pct Magnesium Alloy (A. W. Mullendore and Nicholas J. Grant, 227, 319), A. Gittins and R. C. Gifkins—227, 1472
Greener, E. H.
Influence of a Departure from Stoichiometry on the Microhardness of Rutile at Room Temperature, W. M. Hirthe, D. R. McCann, and E. H. Greener—227, 1467
Gregory, D. P.
Mechanisms of Work Hardening in Columbium, D. P. Gregory, A. N. Stroh, and G. H. Rowe—227, 678
Gregory, E.
Some Observations on the Microstructure and Fragmentation of Solid Carbon Dioxide, A. Coucoulas and E. Gregory—227, 1134
Grieveson, P.
Solubility of Silicon Nitride and Activities of Silver and Silicon in Molten Silver-Silicon Alloys at 1400°C, E. T. Turkdogan and P. Grieveson—227, 1143
Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part I: Reaction Equilibria, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1258
Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part II: Reaction Kinetics of Silica Reduction, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1265
Grube, K. R.
A Machine for Fatigue Tests at Controlled Strain, D. N. Williams and K. R. Grube—227, 1254
Gschneider, Karl
Prediction of Solid Solubility in Metallic Alloys, James T. Waber, Karl Gschneider, Jr., Allen C. Larson, and Margaret Y. Prince —227, 717
Guernsey, D. L.
Aluminum-Oxygen Interaction in Liquid Iron, J. C. d'Entremont, D. L. Guernsey, and John Chipman—227, 14
Guettel, Charles L.
Temperature Coefficients of Electrical Resistance of Nickel-Rich Alloys in the Nickel-Chromium-Iron Alloy System, Charles L. Guettel—227, 586
Gulden, T. D.
Temperature Dependence of Steady-State Creep in a Dispersion-Strengthened Indium-Glass Composite, T. D. Gulden and J. C. Shyne—227, 1088
Gurland, J.
The Fracture Strength of Sintered Tungsten Carbide-Cobalt Alloys in Relation to Composition and Particle Spacing, J. Gurland—227, 1146. Erratum—227, 1452
Hagel, W. C.
Discussion: Self-Diffusion in Solid Chromium (W. C. Hagel, 224, 430), S. J. Rothman and L. T. Lloyd—227, 265
Silicon Contamination of AgMg, J. H. Westbrook and W. C. Hagel—227, 793
Hager, John P.
Thermodynamic Properties of the Silver-Silicon System, John P. Hager—227, 1000
Hancock, H. A.
Equilibria Controlling the Decarburization of Solid Ferro-Chromium by Chromium Oxide, H. A. Hancock and L. M. Pidgeon—227, 608
Hansen, W. R.
Effects of Metallurgical Variables on Charpy and Drop-Weight Tests, F. W. Boulger and W. R. Hansen—227, 1212
Hard, Robert A.
Solvent Extraction of Transition Metals from Thiocyanate Solutions, Renato G. Bautista and Robert A. Hard—227, 124
Hartley, K.
Reprocessing Fast Reactor Fuels at Dounreay, D. M. Donaldson, K. Hartley, P. Lees, and N. Parkinson—227, 191
Hausner, H. H.
The Influence of Gravity in Sintering, F. V. Lenel, H. H. Hausner, O. V. Roman, and G. S. Ansell—227, 640
Healy, G. W.
Calculation of Oxygen, Silicon, and Manganese in Iron Melts from Slag Activity Data, G. W. Healy—227, 207
Discussion: Activities of Oxides in SiO_2-FeO-Fe_2O_3 Melts (E. T. Turkdogan, 224, 294), G. W. Healy—227, 270
Heckler, A. J.
The Activity of Carbon in Iron-Nickel-Carbon Austenite, A. J. Heckler and P. G. Winchell—227, 732
Hehemann, R. F.
Growth Kinetics and the Mechanism of the Bainite Transformation, R. H. Goodenow, S. J. Matas, and R. F. Hehemann—227, 651
Henderson, John
Structure and Transport in Lime-Silica-Alumina Melts, John Henderson—227, 534
Hendricks, Robert W.
Crystal Orientation in the Cylindrical X-Ray Camera, Robert W. Hendricks and John B. Newkirk—227, 712

Hepworth, M. T.
Discussion: Thermodynamic Properties of Titanium-Oxygen-Hydrogen Alloys (M. T. Hepworth and R. Schuhmann, Jr., 224, 928), Kenneth A. Moon—227, 769
Herman, M.
Three Dimensional Aspects of Dislocations and Substructures in Bulk Zinc Crystals, V. V. Damiano, G. S. Tint, and M. Herman—227, 994
Herrnstein, W. H.
Evidence for Reversion During Cyclic Loading of an Aluminum Alloy, A. J. McEvily, Jr., J. B. Clark, E. C. Utley, and W. H. Herrnstein, III—227, 1093
Hertzberg, R. W.
Fracture Mechanisms in Controlled Cu-Cr Eutectic Alloy, R. W. Hertzberg and R. W. Kraft—227, 580
Hesson, J. C.
Uranium Diffusivity in Liquid Cadmium, J. C. Hesson and Leslie Burris—227, 571
Heyer, R. H.
Discussion: Plastic Anisotropy of Cold Rolled-Annealed Low-Carbon Steel Related to Crystallographic Orientation (J. A. Elias, R. H. Heyer, and J. H. Smith, 224, 678), W. F. Hosford —227, 272. Erratum—227, 800
Hilliard, J. E.
Iron-Carbon Phase Diagram: Isobaric Sections of the Eutectoid Region at 35, 50, and 65 Kilobars, J. E. Hilliard—227, 429
Hirano, Ken-ichi
Self-Diffusion in Alpha Iron During Compressive Plastic Flow, Ken-ichi Hirano, Morris Cohen, B. L. Averbach, and N. Ujiiye—227, 950
Hirschhorn, Joel
The Strength of Vapor-Deposited Nickel Films, Carmine D'Antonio, Joel Hirschhorn, and Lemuel Tarshis—227, 1346
Hirthe, W. M.
Influence of a Departure from Stoichiometry on the Microhardness of Rutile at Room Temperature, W. M. Hirthe, D. R. McCann, and E. H. Greener—227, 1467
Hoch, Michael
The Polymorphic Forms of Chromium. Examination of the Cr-Ni and Cr-Fe Systems by High Temperature X-Ray Diffraction Technique, Walter C. Wyder and Michael Hoch—227, 588
Holtz, F. C.
On Dispersion Strengthening of Zirconium, D. Weinstein and F. C. Holtz—227, 1463
Homan, C. G.
Some Observations on the Effects of Hydrostatic Pressures to 20,000 Atm on the Structure of Polycrystalline Bismuth, T. E. Davidson and C. G. Homan—227, 167
Honeycutt, C. R.
Erratum: Discussion: Grain Refinement of Steel Ingots by Solidification in a Moving Electromagnetic Field (Langenberg, Pestel, and Honeycutt, 221, 993) by Dr. Otto Schaaber—227, 275
Hook, R. E.
The Occurrence and Partitioning of Impurity Phases in Recrystallized Chromium, R. E. Hook, H. J. Garrett, and A. M. Adair —227, 145
On the Recrystallization Embrittlement of Chromium, Rollin E. Hook and Attwell M. Adair—227, 151
Hordon, M. J.
Strain Hardening of Ordered Cu_3Au Alloy, M. J. Hordon—227, 260
Hornbogen, E.
Two Types of Discontinuous Precipitation in Alpha Iron Solid Solutions, E. Hornbogen—227, 1411
Hosford, W. F.
Discussion: Plastic Anisotropy of Cold Rolled-Annealed Low-Carbon Steel Related to Crystallographic Orientation (J. A. Elias, R. H. Heyer, and J. H. Smith, 224, 678), W. F. Hosford —227, 272. Erratum—227, 800
Howard, Eugenia M.
On the Thermally-Activated Mechanism of Prismatic Slip in the Silver-Aluminum Hexagonal Intermediate Phase, Eugenia M. Howard, Willis L. Barmore, Jim D. Mote and John E. Dorn 227, 1061
Hren, J. A.
Direct Observations of Precipitation in Thin Foils of Al-20 Pct Ag Alloy, J. A. Hren and G. Thomas—227, 308
Hruska, S. J.
Reformulation of Vapor-Solid Nucleation Kinetics, S. J. Hruska —227, 248
Hu, Hsun
Texture Transition in Copper, Hsun Hu and S. R. Goodman—227, 627
Cube Texture in Austenitic Stainless Steel, Hsun Hu and S. R. Goodman—227, 1454
Hucke, Edward E.
Electrotransport and Resistivity in the Molten Bismuth-Tin System, John D. Verhoeven and Edward E. Hucke—227, 1156
Hudson, R. M.
Decarburization of Low-Carbon Sheet Steels in Wet Atmospheres Containing Hydrogen, R. M. Hudson—227, 695
Hume-Rothery, W.
Note on "A Statistical Approach to Equilibrium Diagrams", W. Hume-Rothery—227, 791
Hunt, P. D.
The Zinc-Vanadium Phase Diagram, M. G. Chasanov, R. Schablaske, P. D. Hunt, and B. Tani—227, 485
Imgram, A. G.
Effect of O_2 and H_2 on the Mechanical Properties of Tantalum and Columbium at Low Temperatures, A. G. Imgram, E. S. Bartlett, and H. R. Ogden—227, 131
Beta-Titanium Alloys Containing Vanadium, Chromium, and Aluminum, A. G. Imgram, D. N. Williams, and H. R. Ogden —227, 743
Ingraham, T. R.
Thermodynamic Properties of Zinc Sulfate, Zinc Basic Sulfate, and the System Zn-S-O, T. R. Ingraham and H. H. Kellogg— 227, 1419
Jaffe, N.
Effect of Stress and Recovery on the Creep of High-Purity Polycrystalline Aluminum at Intermediate Temperatures, N. Jaffe and J. E. Dorn—227, 1314
Jaffee, R. I.
High-Temperature Solid-Solution-Strengthened Columbium Alloys, E. S. Bartlett, D. N. Williams, H. R. Ogden, R. I. Jaffee, and E. F. Bradley—227, 459
The Development of High Strength Alpha-Titanium Alloys Containing Aluminum and Zirconium, D. N. Williams, R. A. Wood, H. R. Ogden, and R. I. Jaffee—227, 563
The Effect of Impurities and Structure on the Tensile Transition Temperature of Chromium, B. C. Allen, D. J. Maykuth, and R. I. Jaffee—227, 724
Jeannin, Y.
Activities in Iron-Chromium Alloys, Y. Jeannin, C. Mannerskantz, and F. D. Richardson—227, 300
Johnson, P. C.
Shock Hardening and Explosive Ausforming of Alloy Steels, B. A. Stein and P. C. Johnson—227, 1188

Johnson, T.
The Oxidation and Corrosion of Niobium (Columbium), B. Cox and T. Johnston—227, 36
Johnston, W. C.
The Influence of Electromagnetic Stirring on the Nucleation of Tin and Tin-Lead Alloys, W. C. Johnston, G. R. Kotler, and W. A. Tiller—227, 890

Growth Kinetics and the Mechanism of the Bainite Transformation, R. H. Goodenow, S. J. Matas, and R. F. Hehemann—227, 651

Matousek, J. W.

The Thermodynamic Properties of Cu-Ni-S Mattes at 1200°C, J. W. Matousek and C. S. Samis—227, 980

Maykuth, D. J.

The Effect of Impurities and Structure on the Tensile Transition Temperature of Chromium, B. C. Allen, D. J. Maykuth, and R. I. Jaffee—227, 724

McCann, D. R.

Influence of a Departure from Stoichiometry on the Microhardness of Rutile at Room Temperature, W. M. Hirthe, D. R. McCann, and E. H. Greener—227, 1467

McCoy, H. E.

Effect of Interstitial Elements on Twinning in Columbium, C. J. McHargue and H. E. McCoy—227, 1170

McEvily, A. J.

The Effect of Nonuniform Precipitation on the Fatigue Properties of an Age Hardening Alloy, A. J. McEvily, R. L. Snyder, and J. B. Clark—227, 452

Evidence for Reversion During Cyclic Loading of an Aluminum Alloy, A. J. McEvily, Jr., J. B. Clark, E. C. Utley, and W. H. Herrnstein, III—227, 1093

McGrath, J. T.

The Effect of Cross Slip on the Fatigue Behavior of Copper and Copper-Zinc Alloys, J. T. McGrath and R. C. A. Thurston—227, 645

McHargue, C. J.

Effect of Interstitial Elements on Twinning in Columbium, C. J. McHargue and H. E. McCoy—227, 1170

McLaren, E. H.

The Solidification of Dilute Binary Alloys, F. Weinberg and E. H. McLaren—227, 112

McNabb, A.

A New Analysis of the Diffusion of Hydrogen in Iron and Ferritic Steels, A. McNabb and P. K. Foster—227, 618

Meieran, Eugene S.

Preparation of Wires for Examination by Transmission Electron Microscopy, Eugene S. Meieran and David A. Thomas—227, 284

An Analytical Method for Calculating Electron Diffraction Patterns Containing Twin Reflections, E. S. Meieran and M. H. Richman—227, 1044

Metzger, M.

Autocatalytic Acid Corrosion of Aluminum Containing Copper, M. Metzger and O. P. Arora—227, 1305

Michalik, S. J.

A Constitution Diagram for the Molybdenum-Iridium System, S. J. Michalik and J. H. Brophy—227, 1047

Mikami, Harry M.

Mechanisms of Refractory Wear in Copper Converters, Harry M. Mikami and A. Gene Sidler—227, 1229

Minshall, F. S.
The Behavior of Iron-Silicon Alloys Under Impulsive Loading, E. G. Zukas, C. M. Fowler, F. S. Minshall, and J. O'Rourke —227, 746
Mitra, Sandip K.
On the Nature of Strain Hardening in Polycrystalline Aluminum and Aluminum-Magnesium Alloys, Sandip K. Mitra and John E. Dorn—227, 1015
Mohanty, Ganesh P.
X-Ray Study of Cold Work in Lead Telluride, Ganesh P. Mohanty and James J. Wert—227, 282
Moon, Kenneth A.
Discussion: Thermodynamic Properties of Titanium-Oxygen-Hydrogen Alloys (M. T. Hepworth and R. Schuhmann, Jr., 224, 928), Kenneth A. Moon—227, 769
Thermodynamics of Interstitial Solid Solutions with Repulsive Solute-Solute Interactions, Kenneth A. Moon—227, 1116
Mote, Jim D.
On the Thermally-Activated Mechanism of Prismatic Slip in the Silver-Aluminum Hexagonal Intermediate Phase, Eugenia M. Howard, Willis L. Barmore, Jim D. Mote and John E. Dorn 227, 1061
Muan, Arnulf
Activities of Components in Oxide Solid Solutions: The Systems CoO-MgO, CoO-MnO, and CoO-"FeO" at 1200°C, Egil Aukrust and Arnulf Muan—227, 1378
Mueller, M. H.
The Crystal Structures of Ti_2Cu, Ti_2Ni, Ti_4Ni_2O, and Ti_4Cu_2O, M. H. Mueller and H. W. Knott—227, 674
Mullendore, A. W.
Grain Boundary Sliding During Creep of an Aluminum - 2 Pct Magnesium Alloy, A. W. Mullendore and Nicholas J. Grant—227, 319
Discussion: Grain Boundary Sliding During Creep of an Aluminum-2 Pct Magnesium Alloy (A. W. Mullendore and Nicholas J. Grant, 227, 319), A. Gittins and R. C. Gifkins—227, 1472
Murbach, E. W.
The Oxidation of 'Reactive' Uranium Carbide, E. W. Murbach —227, 488
Nakanishi, N.
The Effect of Copper on the Martensitic Transformations in Beta-Phase Au-Cd Alloys, N. Nakanishi and C. M. Wayman—227, 500
Nelson, E. C.
Approximate Calculation of the Change in Solubility of Nitrogen in Molten Iron Alloys as a Function of Temperature, E. C. Nelson—227, 189
Newkirk, John B.
Crystal Orientation in the Cylindrical X-Ray Camera, Robert W. Hendricks and John B. Newkirk—227, 712
Nicholas, M. G.
Cold Bonding Between Hemispherical Copper Surfaces, M. G. Nicholas—227, 250
Nicholson, M. E.
The Solubility of Carbon in Cobalt-Nickel Alloys at 1000°C, K. K. Rao and M. E. Nicholson—227, 1029
Norton, L. J.
Intermediate Phases in the Tantalum-Palladium System, J. B. Darby, Jr., J. W. Downey, and L. J. Norton—227, 1028
Novick, D. T.
Annealing of the Ordered and Disordered Alloy Cu_3Au after Cold Work, B. Roessler, D. T. Novick, and M B. Bever—227, 985
Nunes, John
Tensile Flow and Fracture Temperature Dependence of Some Iron-Base Alloys, John Nunes and Frank R. Larson—227, 1369
Ofte, Donald
Viscosity of Bismuth, Lead, and Zinc to 1000°C, Donald Ofte and L. J. Wittenberg—227, 706
Ogden, H. R.
Effect of O_2 and H_2 on the Mechanical Properties of Tantalum and Columbium at Low Temperatures, A. G. Imgram, E. S. Bartlett, and H. R. Ogden—227, 131
High-Temperature Solid-Solution-Strengthened Columbium Alloys, E. S. Bartlett, D. N. Williams, H. R. Ogden, R. I. Jaffee, and E. F. Bradley—227, 459
The Development of High Strength Alpha-Titanium Alloys Containing Aluminum and Zirconium, D. N. Williams, R. A. Wood, H. R. Ogden, and R. I. Jaffee—227, 563
Beta-Titanium Alloys Containing Vanadium, Chromium, and Aluminum, A. G. Imgram, D. N. Williams, and H. R. Ogden —227, 743
Tantalum Alloys—Some High- and Low-Temperature Properties, F. F. Schmidt, E. S. Bartlett, and H. R. Ogden—227, 856
The Solubility of Carbon in Tantalum, H. R. Ogden, F. F. Schmidt, and E. S. Bartlett—227, 1458
Ogilvie, R. E.
Diffusion in the Uranium-Niobium (Columbium) System, N. L. Peterson and R. E. Ogilvie—227, 1083
Oliver, B. F.
A Levitation Zone Melter for Larger Diameter Bars with Positive Process Control, B. F. Oliver—227, 960
Orem, Theodore H.
Planar Twin Boundary in Aluminum, Theodore H. Orem—227, 786
O'Rourke, J.
The Behavior of Iron-Silicon Alloys Under Impulsive Loading, E. G. Zukas, C. M. Fowler, F. S. Minshall, and J. O'Rourke —227, 746
Owen, W. S.
The Strain-Aging of a Dilute Tantalum-Oxygen Alloy, A. R. Rosenfield and W. S. Owen—227, 603
Panseri, C.
On the Preprecipitation Process in Al-Mg Alloys, C. Panseri, T. Federighi, and S. Ceresara—227, 1122
Parkinson, N.
Reprocessing Fast Reactor Fuels at Dounreay, D. M. Donaldson, K. Hartley, P. Lees, and N. Parkinson—227, 191
Parlee, N. A. D.
The Solubility of Nitrogen and the Precipitation of Vanadium Nitride in Liquid Iron-Vanadium Alloys, N. M. El Tayeb and N. A. D. Parlee—227, 929
Parr, J. Gordon
The Spurious Titanium Transformation, M. J. Bibby and J. Gordon Parr—227, 789
Paxton, H. W.
On the Rates of Growth of Widmanstätten Plates, H. W. Paxton and G. M. Pound—227, 957
Pearce, M. L.
Kinetics of Sulfur Reaction in Oxide Melt-Gas Systems, E. T. Turkdogan and M. L. Pearce—227, 940
The Analysis and Solubility of Nitrogen in Silicon-Iron, M. L. Pearce—227, 1393
Pease, L. F.
Some Modifications in the Diagram for the Tantalum-Zirconium System, L. F. Pease and J. H. Brophy—227, 1245
Pehlke, Robert D.
Interaction Parameters in Dilute Molten Alloys, John M. Dealy and Robert D. Pehlke—227, 88

Solubility of Nitrogen in Liquid Iron Alloys II. Kinetics, Robert D. Pehlke and John F. Elliott—227, 844

Activity Coefficients in Binary Liquid Metallic Solutions at Infinite Dilution, John M. Dealy and Robert D. Pehlke—227, 1030

Pellier, Laurence

Some Observations on the Effect of Sensitization at 1200° F on the Electron Microstructure of a Type-304 Stainless Steel with an Extra High Carbon Content, Laurence Pellier—227, 422

Pestel, Guenter

Erratum: Discussion: Grain Refinement of Steel Ingots by Solidification in a Moving Electromagnetic Field (Langenberg, Pestel, and Honeycutt, 221, 993) by Dr. Otto Schaaber—227, 275

Peterson, N. L.

Diffusion in the Uranium-Niobium (Columbium) System, N. L. Peterson and R. E. Ogilvie—227, 1083

Philbrook, W. O.

Theoretical Analysis of Hydrogen Reduction of Hematite in a Fixed Bed, H. E. Barner, F. S. Manning, and W. O. Philbrook—227, 897

Distribution of Manganese Between Silicate and Aluminate Slags and Carbon-Saturated Iron, W. O. Philbrook and S. K. Tarby—227, 1039

Phillips, W. L., Jr.

The Deformation of Single Crystals of 70 Pct Silver-30 Pct Zinc, W. L. Phillips, Jr.—227, 84

Pidgeon, L. M.

Equilibria Controlling the Decarburization of Solid Ferro-Chromium by Chromium Oxide, H. A. Hancock and L. M. Pidgeon—227, 608

The Production of Reactive Metals—Retrospect and Prospect, L. M. Pidgeon—227, 821

Pierce, J. F., Sr.

Amax Zinc Refiner, S. M. Enterline and J. F. Pierce, Sr.—227, 509

Pin, C.

The Removal of Copper from Liquid Lead by Lead Sulfide Containing Controlled Atomic Defects, C. Pin and J. Bruce Wagner, Jr.—227, 1275

Pollock, D. D.

The Thermoelectric Properties of Some Transition Thermoelements in Common Use, D. D. Pollock and G. P. Conard, II—227, 478

Pound, G. M.

On the Rates of Growth of Widmanstätten Plates, H. W. Paxton and G. M. Pound—227, 957

Powell, G. W.

Discussion: The Energy Relations in the Deformation by Torsion of a Gold-Silver Alloy (A. S. Appleton and M. B. Bever, 227, 365), G. W. Powell—227, 1477

Prince, Margaret Y.

Prediction of Solid Solubility in Metallic Alloys, James T. Waber, Karl Gschneider, Jr., Allen C. Larson, and Margaret Y. Prince—227, 717

Purdy, G. R.

Kinetics of the Proeutectoid Ferrite Reaction at an Incoherent Interface, as Determined by a Diffusion Couple, G. R. Purdy and J. S. Kirkaldy—227, 1255

Puri, O. P.

Magnetostriction and Residual Stress in Nickel after Plastic Elongation, B. D. Cullity and O. P. Puri—227, 359

Pye, J. J.

Measurements of Surface Diffusion Coefficients on Silver Single Crystals, J. B. Drew and J. J. Pye—227, 99

Ramachandran, S.

Equilibrium in the Fe-Mn-Si-O System, R. A. Walsh and S. Ramachandran—227, 560

A Thermodynamic Model for the Deoxidation of Alloy Steels, R. A. Walsh, S. Ramachandran, and J. C. Fulton—227, 1380

Rao, K. K.

The Solubility of Carbon in Cobalt-Nickel Alloys at 1000°C, K. K. Rao and M. E. Nicholson—227, 1029

Rapp, Robert A.

Free Energy of Formation of Molybdenum Dioxide, Robert A. Rapp—227, 371

Rapperport, E. J.

A Study of the Aluminum-Lithium System Between Aluminum and Al-Li, E. D. Levine and E. J. Rapperport—227, 1204

Reed-Hill, R. E.

Determination of Alpha Zirconium $\{11\bar{2}1\}$ Twinning Elements Using Grain Boundary Rotations, R. E. Reed-Hill, W. A. Slippy, Jr., and L. G. Buteau—227, 976

Rein, Richard H.

The Distribution of Silicon Between Fe-Si-C Alloys and SiO_2-CaO-MgO-Al_2O_3 Slags, Richard H. Rein and John Chipman—227, 1193

Reisdorf, B. G.

The Tempering Characteristics of Some 0.4 Pct Carbon Ultra-high-Strength Steels, B. G. Reisdorf—227, 1334

Rhodes, C. G.

Etch Pits in Uranium Monocarbide, C. G. Rhodes—227, 286

Richardson, F. D.

Activities in Iron-Chromium Alloys, Y. Jeannin, C. Mannerskantz, and F. D. Richardson—227, 300

Richman, M. H.

An Analytical Method for Calculating Electron Diffraction Patterns Containing Twin Reflections, E. S. Meieran and M. H. Richman—227, 1044

Richman, R. H.

Plastic Deformation Modes in Fe-Ni-C Martensites, R. H. Richman—227, 159

Discussion: Plastic Deformation Modes in Fe-Ni-C Martensites (R. H. Richman, 227, 159), A. G. Crocker and M. Bevis—227, 1471

Mechanical Twinning in Fe-5 Wt Pct Be, R. H. Richman and G. P. Conard, II—227, 779

Discussion: Mechanical Twinning in Fe-5 Wt Pct Be (R. H. Richman and G. P. Conard, II, 227, 779), A. G. Crocker and M. Bevis—227, 1471

Riegger, Otto K.

The Microstructures of Periclase when Subjected to Steelmaking Variables, Otto K. Riegger, Gerald I. Madden, and Lawrence H. Van Vlack—227, 971

Roberts, J. M.

A Discussion of the Importance of Line Tension on Cottrell's Theory of the Sharp Yield Point, D. M. Barnett and J. M. Roberts—227, 658. Erratum—227, 1032

Robertson, W. D.

Discussion: The Mechanism of Hydrogen Embrittlement Observed in Iron-Silicon Single Crystals (A. S. Tetelman and W. D. Robertson, 224, 775), E. A. Steigerwald—227, 269

Roessler, B.

Annealing of the Ordered and Disordered Alloy Cu_3Au after Cold Work, B. Roessler, D. T. Novick, and M B. Bever—227, 985

Rogerson, J. H.

Effect of the Shapes of Intergranular Liquid on the Hot Cracking of Welds and Castings, J. H. Rogerson and J. C. Borland—227, 2

Roggero, Carlos E.

High Temperature Fluid Bed Roasting of Zinc Concentrates, Carlos E. Roggero—227, 105. Erratum—227, 800

Roman, O. V.
The Influence of Gravity in Sintering, F. V. Lenel, H. H. Hausner, O. V. Roman, and G. S. Ansell—227, 640
Rose, D. J.
Interface Reactions Between Metals and Ceramics Part III: MgO-Fe Alloy System, W. M. Armstrong, A. C. D. Chaklader, and D. J. Rose—227, 1109
Rosenfield, A. R.
The Strain-Aging of a Dilute Tantalum-Oxygen Alloy, A. R. Rosenfield and W. S. Owen—227, 603
Rothman, S. J.
Discussion: Self-Diffusion in Solid Chromium (W. C. Hagel, 224, 430), S. J. Rothman and L. T. Lloyd—227, 265
Rowe, G. H.

Preferred Orientations Developed During the Solidification of High-Purity Lead, G. F. Bolling, J. J. Kramer, and W. A. Tiller—227, 47
Solute Segregation During Cellular Solidification, J. J. Kramer, G. F. Bolling, and W. A. Tiller—227, 374
The Influence of Electromagnetic Stirring on the Nucleation of Tin and Tin-Lead Alloys, W. C. Johnston, G. R. Kotler, and W. A. Tiller—227, 890
Preferred Casting Orientations of High-Purity Zinc and Tin, G. F. Bolling, J. J. Kramer, and W. A. Tiller—227, 1453
Tint, G. S.
Three Dimensional Aspects of Dislocations and Substructures in Bulk Zinc Crystals, V. V. Damiano, G. S. Tint, and M. Herman—227, 994
Toguri, J. M.
The Application of the Mass Action Law to Metal-Slag Equilibria, H. Flood and J. M. Toguri—227, 525

Turkdogan, E. T.

Discussion: Activities of Oxides in SiO_2-FeO-Fe_2O_3 Melts (E. T. Turkdogan, 224, 294), G. W. Healy—227, 270

Kinetics of Sulfur Reaction in Oxide Melt-Gas Systems, E. T. Turkdogan and M. L. Pearce—227, 940

Solubility of Silicon Nitride and Activities of Silver and Silicon in Molten Silver-Silicon Alloys at 1400°C, E. T. Turkdogan and P. Grieveson—227, 1143

Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part I: Reaction Equilibria, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1258

Kinetic and Equilibrium Considerations for Silicon Reaction between Silicate Melts and Graphite-Saturated Iron, Part II: Reaction Kinetics of Silica Reduction, E. T. Turkdogan, P. Grieveson, and J. F. Beisler—227, 1265

Ujiiye, N.

Self-Diffusion in Alpha Iron During Compressive Plastic Flow, Ken-ichi Hirano, Morris Cohen, B. L. Averbach, and N. Ujiiye—227, 950

Utley, E. C.

Evidence for Reversion During Cyclic Loading of an Aluminum Alloy, A. J. McEvily, Jr., J. B. Clark, E. C. Utley, and W. H. Herrnstein, III—227, 1093

Uys, J. M.

The Effect of Basicity on the Solubility of Water in Silicate Melts, J. M. Uys and T. B. King—227, 492

The Effect of Oxygen Pressure on the Solubility of Water in Slags Containing Iron Oxide, J. M. Uys and T. B. King—227, 1457

Vandermeer, R. A.

Discussion: The Mechanism of Boundary Migration in Recrystallization (Paul Gordon and R. A. Vandermeer, 224, 917), W. C. Leslie—227, 768

Van Hook, H. J.

The System InAs-GaAs, H. J. Van Hook and E. S. Lenker—227, 220

Van Vlack, L. H.

The MnO-MnS Phase Diagram, H. C. Chao, Y. E. Smith, and L. H. Van Vlack—227, 796

The Microstructures of Periclase when Subjected to Steelmaking Variables, Otto K. Riegger, Gerald I. Madden, and Lawrence H. Van Vlack—227, 971

Veltman, H.

Aqueous Oxidation of Galena in Acid Media under Pressure, A. Vizsolyi, H. Veltman, and F. Forward—227, 215

Venturello, G.

Influence of Small Amounts of Carbon on Recovery and Recrystallization of High-Purity Iron, G. Venturello, C. Antonione, and F. Bonaccorso—227, 1433

Verhoeven, John D.

Electrotransport and Resistivity in the Molten Bismuth-Tin System, John D. Verhoeven and Edward E. Hucke—227, 1156

Vetrano, J. B.

The Permeability of Hastelloy B to Hydrogen, D. W. Rudd, D. W. Vose, and J. B. Vetrano—227, 781

Vizsolyi, A.

Aqueous Oxidation of Galena in Acid Media under Pressure, A. Vizsolyi, H. Veltman, and F. Forward—227, 215

Vogt, Erich

Mathematics of the Thermal Diffusion of Hydrogen in Zircaloy-2, Anton Sawatzky and Erich Vogt—227, 917. Erratum—227, 1452

Vose, D. W.

The Permeability of Hastelloy B to Hydrogen, D. W. Rudd, D. W. Vose, and J. B. Vetrano—227, 781

Waber, James T.

Prediction of Solid Solubility in Metallic Alloys, James T. Waber, Karl Gschneider, Jr., Allen C. Larson, and Margaret Y. Prince —227, 717

Wadsworth, M. E.

The Oxidation Kinetics of Zirconium Carbide, R. W. Bartlett, M. E. Wadsworth, and I. B. Cutler—227, 467

Wagner, Carl

Measurements of the Activity of Silver in Silver Sulfide Being Reduced by Hydrogen during and after Nucleation of Silver, Hermann Schmalzried and Carl Wagner—227, 539

Wagner, J. Bruce, Jr.

The Removal of Copper from Liquid Lead by Lead Sulfide Containing Controlled Atomic Defects, C. Pin and J. Bruce Wagner, Jr.—227, 1275

Wallace, W. E.

Order-Disorder Transformation in Cd-Rich Mg-Cd Alloys, G. S. Kamath, R. S. Craig, and W. E. Wallace—227, 26

Walsh, R. A.

Equilibrium in the Fe-Mn-Si-O System, R. A. Walsh and S. Ramachandran—227, 560

A Thermodynamic Model for the Deoxidation of Alloy Steels, R. A. Walsh, S. Ramachandran, and J. C. Fulton—227, 1380

Walter, J. L.

Observations on the Cause of Exaggerated Grain Growth in Extra-Low Carbon Enameling Iron, J. L. Walter—227, 1321

Walters, G. P.

Preparation of Beryllium Thin Films, G. P. Walters and W. C. Fuller—227, 1462

Ward, R. G.

Thermal Segregation in Molten Blast Furnace Iron, R. G. Ward —227, 102

A New Technique for Determination of Density of Liquid Metals: Application to Copper, A. E. El-Mehairy and R. G. Ward—227, 1226

Wayman, C. M.

The Effect of Copper on the Martensitic Transformations in Beta-Phase Au-Cd Alloys, N. Nakanishi and C. M. Wayman—227, 500

Weertman, J.

Dislocation-Tangle Formation, J. Weertman—227, 1439

Discussion: An Empirical Relation Defining the Stress Dependence of Minimum Creep Rate in Metals (F. Garofalo, 227, 351), James C. M. Li, J. Weertman—227, 1474

Weinberg, F.

The Solidification of Dilute Binary Alloys, F. Weinberg and E. H. McLaren—227, 112

Grain Boundary Segregation of Thallium in Tin, F. Weinberg —227, 223

Solute Distributions in Directionally Solidified Rods of Dilute Sn-Ag Alloys, F. Weinberg—227, 231

Growth Substructure in Rapidly Solidified Zn-2 Pct Au Alloys, F. Weinberg—227, 276

Weinstein, D.

On Dispersion Strengthening of Zirconium, D. Weinstein and F. C. Holtz—227, 1463

Weinstein, Martin

Solubility of Hydrogen in Liquid Iron Alloys, Martin Weinstein and John F. Elliott—227, 382

The Solubility of Hydrogen in Liquid Pure Metals Co, Cr, Cu, and Ni, M. Weinstein and J. F. Elliott—227, 285. Erratum—227, 800

Wert, James J.
X-Ray Study of Cold Work in Lead Telluride, Ganesh P. Mohanty and James J. Wert—227, 282
Westbrook, J. H.
Discussion: Tensile Behavior of the Intermetallic Compound AgMg (D. L. Wood and J. H. Westbrook, 224, 1024), J. C. Terry and R. E. Smallman—227, 769
Silicon Contamination of AgMg, J. H. Westbrook and W. C. Hagel—227, 793
Wiener, G. W.
Growth Rates of Surface Energy Controlled Secondary Grains in 3 Pct Si-Fe Sheets, K. Foster, J. J. Kramer, and G. W. Wiener—227, 185
Willens, R. H.
Rapid Quenching of Liquid Alloys, Pol Duwez and R. H. Willens —227, 362
Williams, D. N.
High-Temperature Solid-Solution-Strengthened Columbium Alloys, E. S. Bartlett, D. N. Williams, H. R. Ogden, R. I. Jaffee, and E. F. Bradley—227, 459
The Development of High Strength Alpha-Titanium Alloys Containing Aluminum and Zirconium, D. N. Williams, R. A. Wood, H. R. Ogden, and R. I. Jaffee—227, 563
Beta-Titanium Alloys Containing Vanadium, Chromium, and Aluminum, A. G. Imgram, D. N. Williams, and H. R. Ogden —227, 743
A Machine for Fatigue Tests at Controlled Strain, D. N. Williams and K. R. Grube—227, 1254
Williams, R. O.
The Changes in Internal Energy of a Copper-Aluminum Alloy and a Copper-Zinc Alloy Resulting from Deformation and Recovery near 25°C, R. O. Williams—227, 1290
Winchell, P. G.
The Activity of Carbon in Iron-Nickel-Carbon Austenite, A. J. Heckler and P. G. Winchell—227, 732
Winslow, F. R.
Orientation Dependence of the Surface Free Energy on Silver by a New Method, F. R. Winslow and P. G. Shewmon—227, 1078
Wit, Roland de
On the Growth of Helical Dislocations, Roland de Wit—227, 1443
Wittenberg, L. J.
Viscosity of Bismuth, Lead, and Zinc to 1000°C, Donald Ofte and L. J. Wittenberg—227, 706
Wood, D. L.
Discussion: Tensile Behavior of the Intermetallic Compound AgMg (D. L. Wood and J. H. Westbrook, 224, 1024), J. C. Terry and R. E. Smallman—227, 769
Wood, R. A.
The Development of High Strength Alpha-Titanium Alloys Containing Aluminum and Zirconium, D. N. Williams, R. A. Wood, H. R. Ogden, and R. I. Jaffee—227, 563
Wood, W. A.
Discussion: Effect of Superimposed Static Tension on the Fatigue Process in Copper Subjected to Alternating Torsion (W. A. Wood and H. M. Bendler, 224, 18), T. H. Alden—227, 263
Wulff, J.
Nickel-Activated Sintering of Plasma-Sprayed Tungsten Deposits, J. H. Brophy, K. G. Kreider, and J. Wulff—227, 598
Wunderlin, W. J.
The Solid Solubility of Holmium in Copper, Silver, and Gold, W. J. Wunderlin, B. J. Beaudry, and A. H. Daane—227, 1302
Wyder, Walter C.
The Polymorphic Forms of Chromium. Examination of the Cr-Ni and Cr-Fe Systems by High Temperature X-Ray Diffraction Technique, Walter C. Wyder and Michael Hoch—227, 588
Yamane, Toshimi
On the Recovery of the Internal Friction of 39.6 Pct Cold-Worked Ti by Isothermal Annealing at Temperatures Lower than the Recrystallization Temperature, Toshimi Yamane—227, 1024
Yeo, R. B. G.
The Effects of Some Alloying Elements on the Transformation of Fe-22.5 Pct Ni Alloys, R. B. G. Yeo—227, 884
Yim, W. Michael
The Effect of Prior Strain and Polygonization on the Creep-Rupture Properties of Nickel, W. Michael Yim and Nicholas J. Grant—227, 868
Yue, A. S.
Decanted Interface Morphology of Mg-32 Wt Pct Al Eutectic, A. S. Yue—227, 64
Zegler, S. T.
Ternary Cr_3O-Type Phases with Vanadium, S. T. Zegler and J. W. Downey—227, 1407
Zukas, E. G.
The Behavior of Iron-Silicon Alloys Under Impulsive Loading, E. G. Zukas, C. M. Fowler, F. S. Minshall, and J. O'Rourke —227, 746
Zwilsky, K. M.
Influence of Molybdenum on the Mechanical Properties of Ni-Al_2O_3, K. M. Zwilsky, J. T. Blucher, and N. J. Grant—227, 1251

SUBJECT INDEX

Volume 227

Transactions of the Metallurgical Society of AIME

ACOUSTIC WAVES

velocity of, in Hg alloys, 51

ACTIVATION ENERGY

for Ag surface self diffusion, 99
for Cb diffusion in Zr, 592
for creep of Ag-Al intermediate phase, 1061
for creep of FeSi alloys, 665
for creep in In-glass composites, 1088
for martensite decomposition, 94
for oxidation of Zr, 1184
for recovery during creep of Al, 1314
relationship with frequency factor in U-Nb diffusion, 1083
for steady state creep, 22
to unpin dislocation, 658
for viscous flow of Bi, 706
for viscous flow of Pb, 706
for viscous flow of Zn, 706
for Zr self-diffusion, 592

ACTIVATION VOLUME

in Cb plastic flow, 678

ACTIVITY

of Ag in Ag_2S during reduction by H_2, 539
of Ag in liquid Ag-Si alloys, 1143
of C in austenite, effect of Co on, 1461
of C in austenite, effect of Cr on, 538
of C in $(Fe, Cr)_{23}C_6$, 608
of C, in Fe-Ni-C austenite, 732
Coefficient of
in binary liquid alloys at infinite dilution, 1030
of CoO in systems CoO-MgO, CoO-MnO, CoO-FeO, 1378
of Cr in FeCr alloys, 300
of dilute solutes in multicomponent liquid alloys, 88
of H in liquid Fe alloys, 382
of interstitial solutes, theoretical expression for, 1116
of N, in silicon iron, 1393
of Na in nongraphitic C, 1328
of O in Hf-O alloys, 876
of oxides in FeO-MnO-SiO_2 system, calculation of, 207
of S, in Cu-Ni-S mattes, 980
of S in liquid Fe, effect of C on, 1098
of Si in liquid Ag-Si alloys, 1143
of Si in liquid Fe-Si alloys, 1258
of Si, in liquid Fe-Si-C alloys, 473
of Si in liquid Fe-Si-C alloys, effect of C on, 1258
of SiO_2 in BaO-CaO-SiO_2 slag, 1258
of SiO_2 in Fe-Mn-Si-O system, 560
of SiO_2 in SiO_2-CaO-MgO-Al_2O_3 slags, 1193

ADSORPTION

of O_2 in ZrC, enthalpy of, 467

AGGLOMERATION

of H, in Al alloys, 438

AGING (See Also **PRECIPITATION**)

of Al-Cu, effect of electric current on, 615
of Al-Mg alloys, 1122
Effect of
on fatigue of Al alloy, 1093
on recovery of brass, 1290
of Fe-Ni martensites, 1426
of René 41 type alloys, 405
Strain (See **STRAIN AGING**)
of Ti-V-Cr-Al alloys, 743

ALKALI METALS

binding in, theory of, 546

ALUMINUM

Al_2O_3, formation of, in liquid Fe, 14
Al_2O_3, (sapphire), fracture and twinning in, 1053
corrosion of, in HCl, effect of Cu impurity on, 1305
creep of, recovery during, 1314
crystals, effect of surface removal on plastic flow in, 1003
effect of, on ductile-brittle transition in steel, 1212
H agglomeration in, 438
Liquid
solution of transition elements in, kinetics of, 179
reduction cells, Na reaction with C in linings of, 1328
strain hardening of, 529
strain hardening mechanisms in, 1015
torsional deformation in single crystals of, 331
twins in, with planar boundaries, 786

ALUMINUM ALLOYS

Al-Ag, precipitation mechanism in, 308
Al-Cu, corrosion of, in HCl, effect of Cu content on, 1305
Al-Cu, quench aging of, effect of electrical current on, 615
Al-Cu, structural stability of Al-$CuAl_2$ eutectic in, 540
Al-Li, phase diagram of, 1204
Al-Mg, creep of, 319
Al-Mg, fatigue and fracture of, 452
Al-Mg, G.P. zone formation in, 1122
Al-Mg, strain hardening mechanisms in, 1015
Al-Zn, clustering effects on superconducting properties of, 1209
fatigue of, 452
fatigue of, reversion during, 1093
H agglomeration in, 438
solidification of, cracking during, 2

AMORPHOUS STRUCTURE

production of, in alloys, 362

ANELASTICITY (See **INTERNAL FRICTION**)

ANNEALING

of Cu_3Au, 985
Effect of
on ductility of W, 280
on internal friction of cold worked Ti, 1024
on structure of Al-$CuAl_2$ eutectic, 540
of explosively loaded Au-Ag alloy, 1468

AUSFORMING

explosive, of alloy steels, 1188

AUSTENITE

C activity in, effect of Co on, 1461
C activity in, effect of Cr on, 538
cementite solubility in, 429
formation temperature in Fe-Ni alloy, effect of alloying elements on, 884
stabilization of, by reverse martensitic transformation in Fe-Ni, 278

BAINITE

growth kinetics of, 651
mechanism of formation of, 651

BASICITY

Of silicate metals
effect on H_2O solubility, 492

BAUSCHINGER EFFECT

in steel, high strength, 736

BERYLLIUM

microstrain of, effect of surface on, 669
thin films of, preparation of, 1462

BLAST FURNACE

Iron
Mn distribution between slag and metal in, 1039
segregation in subhearth metal in, 102
Lead
continuous tapping of, 177

BINDING

metallic, theory of, 546

BISMUTH

deformation of, under high pressure, 167
Liquid
viscosity of, 706

BISMUTH ALLOYS

Bi-Se, monotectic reaction in, 18
Bi-Sn, liquid, electromigration and resistivity in, 1156

CADMIUM

creep of, under cyclic stress, 798
diffusion coefficient of U in, 571
mechanical properties of, 70
vapor, deposition of, on Cu, 248

CADMIUM ALLOYS

Cd-Mg, mechanical properties of, 70
Cd-Mg, order-disorder reaction in, 26

CASTING

cracking during, 2

CARBIDES

Cemented
Wc-Co alloys, fracture strength of, 1146
chromium, equilibrium of, with Cr_2O_3 and CO, 608
$(Fe, Cr)_{23}C_6$, activity of C in, 608
Mn_7C_3, thermodynamic properties of, 542
precipitation of, during tempering, 1334
precipitation of, in stainless steel, 422
TaC_X, properties of, 1361
UC, etch pits in, 286

CARBON

Activity of
in austenite, effect of Cr on, 538
in $(Fe, Cr)_{23}C_6$, 608
in Fe-Ni-C austenite, 732
dioxide, microstructure of, 1134
effect of, on ductile-brittle transition in steel, 1212
Na activity in, nongraphitic, 1328
Na diffusivity in, nongraphitic, 1328
Solubility of
in Co-Ni alloys, 1029
in liquid Fe-Si-Mn alloys, 536

CHROMIUM

activity of, in Fe-Cr alloys, 300
carbides, equilibrium of, with Cr_2O_3 and CO, 608
ductile-brittle transition, effect of interstitials on, 724
extraction of, from thiocyanate solutions, 124
grain boundary segregation of impurities in, 145
grain growth of, effect of interstitials on, 724
hardness of, effect of interstitials on, 724
high purity, impurity phases in, 145
liquid, H solubility in, 285
oxidation of, catastrophic, 346
oxide, free energy of formation of, 300
polymorphic forms of, 588
recrystallization of, effect of interstitials on, 724
recrystallization embrittlement of, 151

CHROMIUM ALLOYS

Cr-Fe, phase diagram, 588
Cr-Fe-C system, decarburization of, 608
Cr-Ni, phase diagram, 588
Cr-Ti, phase diagram of, 1342

CLUSTERING (See also **GUINIER-PRESTON ZONES**)
in Al-Ag alloys, 308
in Al-Mg alloys, 1122
in Al-Zn, effect of, on superconducting properties, 1209

COBALT

extraction of, from thiocyanate solutions, 124
liquid, H solubility in, 285
liquid, surface energy of, 1175
oxide, activity of, in systems CoO-MgO, CoO-MnO, CoO-FeO, 1378
strain hardening of crystals of, 762

COBALT ALLOYS

Co-Au, metastable solid solutions in, 965
Co-Cu, metastable solid solutions in, 965
Co-Ni, C solubility in, 1029
Co-S system, liquid, electrical conductivity of, 1034
Co-V-Zr, structure of $Zr(VCo)_2$, 687

COLD WORK (See also **STRAIN HARDENING**)

Effect of
on U microstructure, 1151
on X-ray line broadening, 447
on X-ray line broadening in PbTe, 282

COHESIVE ENERGY

theory of, of alkali metals, 546

COLUMBIUM

corrosion of, 36
liquid, surface energy of, 1175
mechanical properties of, 131
oxidation of, 36
twinning of, effect of interstitials on, 1170
work hardening mechanisms in,678

COLUMBIUM ALLOYS

Cb-U, diffusion in, 1083
mechanical properties of, 459

CONDENSATION

Vapor-solid
nucleation kinetics in, 248

COMPRESSIBILITY

of Hg alloys, 51

CONDUCTIVITY, ELECTRICAL

correlation of, with temperature coefficient of resistance, 60
of Co-S, Ni-S, Cu-S and Ag-S systems, molten, 1034

COPPER

annealing texture of, 627
converter, wear of refractories in, 1229
Effect of
in Au-Cd martensite, 500
fatigue behavior of, 645
fatigue of, effect of environment on, 1296
fatigue mechanism in, 263
interfacial voids in, 7
liquid, density of, 1226
liquid, H solubility in, 285
liquid, surface energy of, 1175
pressure bonding of, 250
rolling texture transition in, 627
sintering of, 640
surface energy of, 80
strain hardening of single crystals of, 529
surface diffusion coefficient for, 515

COPPER ALLOYS

Cu-Al, cross-slip in easy glide of, 835
Cu-Al, slip line structure on surface of, 257
Cu-Al, stored energy in, 1290
Cu_3Au, annealing of, 985
Cu_3Au, strain hardening of, 260
Cu-Co, metastable solid solutions in, 965
Cu-Cr eutectic, fracture mechanism in, 580
Cu-Ho, phase diagram of, 1302
Cu-Ni-S mattes, S activity in, 980
Cu-S, liquid, electrical conductivity of, 1034
Cu-Zn, growth of β layers in γ-α diffusion couples, 838
Cu-Zn, fatigue behavior of, 645
Cu-Zn, stored energy in, 1290

CORROSION

of Al in HCl, effect of Cu content on, 1305
of Cb, 36

CRACKING

during solidification, 2
Grain boundary,
in Al and Al alloys, 438
nucleation of, in MgO crystals, 1103

CREEP

activation energy for, in Fe-Al system, 22
of Au single crystals, 529
of Cd under cyclic stress, 798
of FCC crystals, effect of surface removal on, 1003
of Fe-Si alloys, activation energy for, 665
grain boundary sliding in, 319
Mechanism of
in Al, 1314
in Al-Mg, 319
dislocation node motion, 1474
in Fe-Al system, 22
grain boundary sliding, 1472
of Ni, effect of prior strain on, 868
recovery during, effect of stress on, 1314
surface condition effect on, 529
of Ti-Al-Zr alloys, 563
of Zn single crystals, 529

CREEP RATE

of Ag-Al intermediate phase, 1061
effect of order on, 665
effect of order on, in Ni_3Fe, 277
of In dispersion hardened with glass, 1088
stress dependence of, 22
stress dependence of, 351
stress dependence of, 1474

CROSS-SLIP

in Ag-Zn single crystals, 84
in Bi, under high pressure, 167
during easy glide, 257
in easy glide, in Cu-Al crystals, 835
in fatigue of Cu-Zn alloys, 645

DECARBURIZATION

of ferrochromium, 608
of low-C steel in wet H_2, 695

DENSIFICATION

of plasma-sprayed W, 598

DEOXIDATION

of Fe liquid, equilibrium constant for, 14
of Fe liquid by Si and Mn, 207
of stainless steels, thermodynamic model for, 1380
of steel using silicon, 560

DENSITY

of Hg alloys, 51
of liquid metals, determination of, 1226

DIFFUSION

in β brass, mechanism of, 838
of H in Fe, theory of, 618
in liquid slag, relation to structure of, 534
in multiphase ternary couples, convention for plotting diffusion paths, 1250
self, of ferrite, during plastic flow, 950
Surface
of Ag on Ag, 99
in Cu, 515
mechanism of, 784
surface effects during, in Kirkendall experiment, 778
Thermal
in blast furnace iron, 102
of H in Zircaloy-2, 917

DIFFUSION COEFFICIENT

of Ag in Al, 308
of Cb in Zr, 592
of α-Fe, effect of plastic flow on, 950
of H in Fe, anomalous behavior of, 618
Interface
at β-α and β-γ brass interfaces, 838
of Na in nongraphitic C, 1328
of Si in C saturated liquid Fe, 1265
Surface
of Ag on Ag, 99
of Cu, 515
in U-Cb alloys, 1083
of U in liquid Cd, 571
in U, γ phase, 265
of Zr in Zr, 592

DIRECT REDUCTION

of iron oxide, rate of, 290
of phosphorus-bearing iron ores, 136
rate equation for, 203

DISLOCATIONS

configuration of in Cb, 678
in cph structures, dissociation and interaction of, 788
density of, change with strain of, 1015
etch patterns of, in Cd doped Zn, 994
grain boundary sources of, 239
helix formation, mechanism of, 1439
helix formation, mechanism of, 1443
intersection of, 1015
locking of, in Ta-O alloy, 603
rearrangement of, during annealing, 994
in reversion of Al alloy during fatigue, 1093
role of, in discontinuous precipitation, 1411
tangle formation from helices, mechanism of, 1443
unpinning of, 658

DISPERSION HARDENING

of In with glass, effect on creep rate of, 1088
of Ni with Al_2O_3, effect of Mn on, 1251
of WC-Co alloys, 1146
of Zr, 1463

DISTILLATION

of $MoCl_5$, 32
in Zn refining, 509

DISTRIBUTION COEFFICIENT

in dilute Zn, Sn, and Pb based alloys, 112

DOMAIN SIZE

Antiphase
effect of, on strain hardening, 260
restricted growth of, in Cu_3Au, 985

DUCTILITY (See also **TRANSITION TEMPERATURE**)

of Cd during cyclic stressing, 798
of Cd and Cd-Mg alloys, 70
of Ta alloys at low temperature, 856

EASY GLIDE

in Ag-Zn single crystals, 84
cross-slip in, in Cu-Al crystals, 835
of Cu-Al crystals, 257

ELASTIC CONSTANTS

theoretical calculation of, 546

ELECTROLYSIS

Of fused salts
of reactive metals, 821

ELECTROMIGRATION

in liquid Bi-Sn alloys, 1156

ELECTRON DIFFRACTION

patterns, indexing of, from twinned region, 1044

ELECTRON MICROSCOPY

Be film preparation, 1462
Transmission
wire preparation technique for, 284

ELECTRONIC STRUCTURE

of metals, 546

EMBRITTLEMENT

Hydrogen
in Cb and Ta, 131
mechanism of, 269
recrystallization, of Cr, 151

EMISSIVITY

of liquid Fe, 482

ENERGY

cohesive, 546
correlation, of valence electrons, 546
exchange, of valence electrons, 546
Surface
of Ag, dependence on orientation of, 1078
of Cu, 80
of Cu liquid, 1175
as driving force in secondary recrystallization, 185
effect of point defects on, 306
effect of, on solidification cracking, 2
of Fe alloys, liquid, 1098
of Fe liquid, 1098
of liquid transition metals, 1175
measurement of, 400
orientation dependence of, 400

Stored
in Au-Ag, 365
in Au-Ag after explosive loading, 1468
in Cu-Al and Cu-Zn, 1290
in torsion specimen, 1477

EQUATIONS OF STATE

of polyvalent metals, 546

EQUILIBRIUM CONSTANT

for Al_2O_3 formation in Fe liquid, 14
in metal-slag systems, 525
for sulfurization of oxide melts, 940

ETCH PITS

in UC, technique for producing, 286

EUTECTICS

Ag-Si, 1000
Al-$CuAl_2$, structural stability of, 540
Cu-Cr, fracture mechanisms in, 580
interface morphology of, 64
Mg-Sn, microstructure of, 393

EXPLOSIVE FORMING

of alloy steels, 1188

FATIGUE MECHANISM

in 2024-T4 Al, age hardened, 1093
in Cu, 263
Effect of
alloying on, 645
environment on, in Cu, Ni, and stainless steel, 1296
nonuniform precipitation on, 452
of MgO crystals, 1103

FATIGUE PROPERTIES

of Cu, 1296
of Cu-Zn alloys, 645
determination of, apparatus for, 1254
Effect of
aging and reversion on, 1093
nonuniform precipitation on, 452
of Ni, 1296
of 316 stainless steel, 1296

FLOTATION

influence of solid state point defects on, 306

FRACTURE

brittle, of CO_2, 1134
of Cd and Cd-Mg alloys, 70
cleavage, of Zn crystals, 1069
in Cr, recrystallized, 151
in Cu-Cr eutectic, 580
Effect of
nonuniform precipitation on, 452
temperature on, in Fe base alloys, 1369
in sapphire, 1053
of two-phase W-Ni-Fe composites, 1127
of WC-Co alloys, 1146

FREE ENERGY

Of formation
of Cr_2O_3, 300
of MoO_2, 371
of Y-Zn compounds, 910

GALLIUM

GaAs-InAs phase diagram, 220

GAS-SOLID REACTIONS (See also **SPECIFIC PROCESS**)
kinetics of, general equation for, 203

GERMANIUM ALLOYS

transition element germanides, ternary, 575

GOLD

creep of single crystals of, 529
crystals, effect of surface removal on plastic flow of, 1003

GOLD ALLOYS

Au-Ag, annealing kinetics of explosively loaded, 1468
Au-Ag, stored energy of cold work in, 365
Au-Ag, surface effects during interdiffusion in, 778
Au-Cd system, martensitic transformation in, 500
Au-Co, metastable solid solutions in, 965
Au-Ho, phase diagram of, 1302
grain delineation in foils of, 795

GRAIN BOUNDARIES

delineation of, in Au alloy foils, 795
dislocation sources in, 239
grooving of, 1078
impurity segregation to, in Cr, 145
liquid film at, effect on grain growth of, 783
migration of, in Cr, 145
migration of, effect of impurities on, 699
Mobility of
in Fe, effect of interstitial impurities on, 1433
role of, in discontinuous precipitation, 1411
segregation of H to, in Al alloys, 438
segregation of Ti to, in Sn, 223
Sliding of
in creep, 319
mechanism of, in creep, 1472
voids at, in CO_2, 1134

GRAIN GROWTH

in alnico alloys, 791
of CO_2, 1134
of Cr and Cr with interstitials, 724
Discontinuous
in enameling iron, cause of, 1321
in Fe-Si, 776
in Fe-Si, rate of, 185
grain boundary migration during, 699
inhibition of, by H agglomeration, 438
in periclase, factors affecting, 971
in presence of intergranular liquid, 783

GRAIN SIZE

Effect of
on ductile-brittle transition, 505
on ductile-brittle transition in steel, 1212
on ductility of W, 280
on fracture stress of Cd, 70

on yield stress of Ta, 772
on yield stress of Ta-W alloy, 772
of enameling iron, factors affecting, 1321
Petch relation for flow stress dependence on, 239

GROWTH RATE

of β brass layers in γ-α brass diffusion couples, 838
of Ni_3Ti in austenite, 754
of Widmanstätten plates, capillarity effects on, 957

GUINIER-PRESTON ZONES (See also CLUSTERING)

in Al-Ag alloy, 308
in Al-Mg alloy, 1122

HAFNIUM

liquid, surface energy of, 1175
Hf-O, lattice parameters of, 876
Hf-O, thermodynamic properties of, 876
Hf-W, phase diagram of, 264

HARDENING OF STEEL (See STEEL, HARDENING)

HARDNESS

of Cr and Cr with interstitials, 724
of Ti, changes of during recovery, 1024
of TiO_2, effect of stoichiometry on, 1467

HEAT FLOW

in gas-granular bed systems, 802

HOLMIUM ALLOYS

Ho-Ag, phase diagram of, 1302
Ho-Au, phase diagram of, 1302
Ho-Cu, phase diagram of, 1302

HYDROGEN

agglomeration of, in Al alloys, 438
diffusion of, in Fe, theory of, 618
Effect of
on mechanical properties of Cb and Ta, 131
excess entropy of, in V-H, Nb-H and Ta-H solid solutions, 1116
permeability of Hastelloy B to, 781
reduction of Fe_2O_3 by, 897
solubility of, in liquid Co, Cr, Cu and Ni, 285
solubility of, in liquid Fe alloys, 382
thermal diffusion of, in Zircaloy-2, 917

HYSTERESIS LOSSES

effect of residual stress on, 356

INDIUM

dispersion hardened with glass, creep of, 1088
InAs-GaAs phase diagram, 220

INTERACTION COEFFICIENT

for C and Co in austenite, 1461
for C and Cr in austenite, 538
in dilute multicomponent liquid alloys, 88
in liquid Fe-Si-C alloys, 473

INTERFACES

Solid-liquid
cellular morphology of, 374
dihedral angles of, 2
MgO-Fe, reactions at, 1109
morphology of, in dilute binary alloys, 112

INTERFACES

Solid-liquid
morphology of, during eutectic solidification, 64
Solid-solid
bainite-austenite, model of, 651
boundary migration mechanism in recrystallization, 768
capillarity effects at, during growth of Widmänstatten plates, 957
ferrite-austenite, rate of motion of, 1255
habit plane of Ni_3Ti in austenite, 754
habit plane of titanium hydride in Ti-H system, 1166
lamellar, in Mg-Mg_2Sn eutectic, 393
voids in, 7

INTERMEDIATE PHASES

Ag-Al system, creep of, 1061
AgMg, Si contamination of, 793
AgMg, tensile properties of, 769
Cr_3O type, in ternary V alloys, 1407
germanides, ternary, of transition elements, 575
Laves phases
atomic radius of Si in, 991
$Zr(VCo)_2$, atomic arrangements in, 687
in Mo-Ir system, 1047
nonequilibrium, production of, 362
PbTe, X-ray study of cold work in, 282
silicides, ternary, of transition elements, 575
TaC_X, properties of, 1361
in Ta-Ir system, 1401
in Ta-Pd system, 1028
Ti_2Cu, crystal structure of, 674
Ti_4Cu_2O, crystal structure of, 674
Ti_2Ni, crystal structure of, 674
Ti_4Ni_2O, crystal structure of, 674
VMn, CsCl-type structure in, 1460
in Y-Zn system, 910

INTERNAL FRICTION

of Ti, cold worked and annealed, 1024

IONIC EXCHANGE

in slag-metal equilibria, 525

IRIDIUM

liquid, surface energy of, 1175

IRIDIUM ALLOYS

Ir-Mo, phase diagram of, 1047
Ir-Ta, phase diagram of, 1401

IRON

ductile-brittle transition in, 505
extraction of, from thiocyanate solutions, 124
flow and fracture temperature dependence in, 1369
H diffusion in, theory of, 618
Liquid
composition after deoxidation, calculation of, 207
deoxidation of, by Al, 14
deoxidation of, by Si, 560
emissivity of, 482
equilibrium of, with slag, 525
H solubility in, 382
surface energy of, 1098

surface energy of, 1175
recovery of, effect of interstitial impurities on, 1433
recrystallization of, effect of interstitial impurities on, 1433
recrystallization texture in crystal of, 1011
self-diffusion of, during plastic flow, 950
torsional deformation in single crystals of, 340

IRON ALLOYS

enameling iron, secondary recrystallization of, cause of, 1321
Fe-Al, creep in, 22
Fe-Be, twinning in, 779
Fe-C, effect of pressure on phase diagram, 429
Fe-C, flow and fracture temperature dependence in, 1369
Fe-C, growth rate of Widmanstätten α growing in γ, 957
Fe-C, α-γ interface motion rate in, 1255
Fe-C, martensite strengthening mechanism in, 1080
Fe-C-Co, activity of C in, 1461
Fe-C-Cr, C activity in austenitic phase of, 538
Fe-Cr, activity of Cr in, 300
Fe-Cr, flow and fracture temperature dependence in, 1369
Fe-Cr, intensity of Fe and Cr Kα radiation in, 270
Fe-Cr-C system, decarburization of, 608
Fe-Mn, flow and fracture temperature dependence in, 1369
Fe-Mo, discontinuous precipitation mechanism in, 1411
Fe-Ni, age hardening of martensites in, 1426
Fe-Ni, austenite stabilization in, by reverse martensitic transformation, 278
Fe-Ni, effect of alloying elements on M_S and A_S temperatures in, 884
Fe-Ni, flow and fracture temperature dependence in, 1369
Fe-Ni-C austenite, C activity in, 732
Fe-Ni-C, deformation modes in martensites of, 159
Fe-Ni-C, tempering of martensite in, 94
Fe-Ni-Ti system, Ni_3Ti precipitation in, 754
Fe-Si, creep of, 665
Fe-Si, N solubility and activity in, 1393
Fe-Si, recrystallization texture in, 1011
Fe-Si, secondary recrystallization in, 185
Fe-Si, textures in, 905
Fe-Si, transition pressure in, 746
Fe-W, brittle-ductile transition, 505
Fe-Zn, discontinuous precipitation mechanism in, 1411
H solubility in, liquid, 382
Liquid
Fe-C, Mn content of, in equilibrium with slag, 1039
Fe-Si, Si activity in, 1258
Fe-Si-C, effect of C on Si activity in, 1258
Fe-Si-C, equilibrium of, with slag, 1193
Fe-Si-Mn, graphite solubility in, 536
Fe-Si-C, Si diffusivity in, 1265
Fe-V, N solubility in, 929
Fe-V, VN precipitation in, 929
N solubility in, 189
N solubility in, kinetics of, 844
Si activity in, 473
surface energy of, 1098
thermal diffusion in, in blast furnace, 102

IRON OXIDES

direct reduction of, 136
Fe_2O_3, equilibrium constant for formation of, 270
Fe_2O_3, H_2 reduction of, 897
reduction of, rate of, 290

IRREVERSIBLE THERMODYNAMICS

applied to thermal diffusion, 102

LAVES PHASES (See INTERMEDIATE PHASES)

LEAD

blast furnace, continuous tapping of, 177
liquid, viscosity of, 706
oxide, effect of, in catastrophic oxidation, 346
solidification texture in, 47
Sulfide
doped, decopperization of liquid Pb by, 1275
flotation of, 306
oxidation of, 215
point defects in, 306
Refining
Cu removal from liquid Pb using doped PbS, 1275
telluride, X-ray study of cold work in, 282

LEAD ALLOYS

segregation in, during solidification, 112

LITHIUM

fluoride
strain fields around intersecting slip planes in, 797

LIQUIDS

density of, determination of, 1226
theory of, 51
theory of, 88

MAGNESIUM

oxide, factors affecting microstructures of, 971
oxide, strain hardening of, 1103
oxide, wettability of, by Fe, 1109
torsional deformation in single crystals of, 331
Eutectic microstructure in,
Mg-Sn alloy, 393

MAGNESIUM ALLOYS

Mg-Ag, Si contamination of AgMg, 793
Mg-Ag, tensile properties of AgMg, 769
Mg-Al, interface morphology of, during eutectic solidification, 64
Mg-Cd system, order-disorder reaction in, 26

MAGNET ALLOYS

Alnico, grain growth in, 791

MAGNETOSTRICTION

effect of residual stress on, 359
in Ni, 359

MANGANESE

carbide, Mn_7C_3, thermodynamic properties of, 542
distribution of, between slag and Fe, 1039
effect of, on ductile-brittle transition in steel, 1212
effect of, in deoxidation of steel, 560
extraction of, from thiocyanate solutions, 124

MANGANESE ALLOYS

MnO-MnS phase diagram, 796
Mn-V, CsCl-type structure in VMn, 1460

MARTENSITE

age hardening of, in Fe-Ni system, 1426
decomposition kinetics of, 94
Fe-Ni-C system, deformation modes in, 159

strengthening mechanism of, 1080
tetragonality of, 1465
twinning modes in, 1471

MARTENSITIC TRANSFORMATION

in Au-Cd system, 500
in Fe-Ni alloy, effect of alloying elements on, 884
reverse, austenite stabilization by, in Fe-Ni, 278

MATTES

Cu-Ni-S, S activity in, 980

MERCURY ALLOYS

physical properties of, 51

MOLYBDENUM

dioxide, free energy of formation of, 371
high purity, preparation of, 32
liquid, surface energy of, 1175

MOLYBDENUM ALLOYS

Mo-Ir, phase diagram of, 1047

MONOTECTICS

microstructure of, in Bi-Se system, 18

NICKEL

creep of, effect of prior strain on, 868
dispersion hardened with Al_2O_3, effect of Mn additions on, 1251
fatigue of, effect of environment on, 1296
liquid, H solubility in, 285
liquid, surface energy of, 1175
magnetostriction in, 359
Ni_3Ti precipitation in Fe-Ni-Ti, 754
stress-rupture of, effect of prior strain on, 868
substructure of, after solidification, 1282
thin films of, strength of, 1346
use of, in sintering W, 598

NICKEL ALLOYS

Hastelloy B, permeability of, to hydrogen, 781
Ni-Ag, substructure of, after solidification, 1282
Ni-Co, C solubility in, 1029
Ni-Cr-Fe, electrical resistance of, 586
Ni-Fe, effect of order on creep in, 277
Ni-S, grain growth of, in presence of intergranular liquid, 783
Ni-S, liquid, electrical conductivity of, 1034
Ni-ThO_2, structural stability in, 1455
René 41 type
  mechanical properties of, 405
  phases formed in, effect of alloying on, 405

NIOBIUM (See COLUMBIUM)

NITROGEN

solubility and activity of, in silicon iron, 1393
solubility of, in liquid Fe alloys, 189
solubility of, in liquid Fe alloys, kinetics of, 844
solubility of, in liquid Fe-V alloys, 929

NOTCH SENSITIVITY

of Cb, 131
of Ta, 131

NUCLEAR REACTORS

fuel reprocessing for, 191

NUCLEATION

Kinetics of
  in solidification, 890
  in vapor deposition, 248
sites for, in discontinuous precipitation, 1411

ORDER

Effect of
  on creep of Ni_3Fe, 277
  on creep rate, 665
Formation of
  in cold worked Cu_3Au, 985
  kinetics of, in Mg-Cd system, 26
Hardening
  of Cu_3Au, 260

ORIENTATION OF CRYSTALS

determination of, using cylindrical Laue photograph, 712
effect of, on fracture stress, 1069

OSMIUM

liquid, surface energy of, 1175

OXIDATION

catastrophic, mechanism of, 346
of Cb, 36
of metals, rate equation for, 203
of PbS, by H_2O in acid media, 215
of UC, 488
of ZrC, kinetics of, 467
of Zr, kinetics of, 1184

OXIDE EXCHANGE

in slag-metal equilibria, 525

OXIDES

CoO, activity of, in systems CoO-MgO, CoO-MnO, CoO-FeO, 1378
Fe_2O_3, formation of, equilibrium constant for, 270
MgO, factors affecting microstructures of, 971
MgO, wettability of, by Fe, 1109
of Ti, crystal structure of, 769
TiO_2, effect of stoichiometry on hardness of, 1467

OXYGEN

activity of, in Hf-O alloys, 876
Effect of
  on mechanical properties of Cb and Ta, 131
in Ta-O system, strain-aging due to, 603

PALLADIUM

liquid, surface energy of, 1175

PALLADIUM ALLOYS

Pd-Ta system ,intermediate phases in, 1028

PEENING

Effect of
  on X-ray line broadening, 447

PERMEABILITY

of Hastelloy B to hydrogen, 781

PHASE DIAGRAMS

Al-Li system, 1204
Ag-Ho system, 1302
AgMg-Si quasibinary, 793
Ag-Si system, 1000
Au-Ho system, 1302
Cr-Fe system, 588
Cr-Ni system, 588
Cu-Ho system, 1302
Cu-Ni-S system, 980
effect of valency on, 791
Fe-C, effect of pressure on, 429
Fe-Cr-C system, 608
InAs-GaAs system, 220
liquidus determination, X-ray technique for, 535
Mg-Cd system, 26
MnO-MnS system, 796
Mo-Ir system, 1047
prediction of solid solubility in, 717
Sc-Y system, 865
Sc-Zr system, 865
Ta-C system, 1458
Ta-Ir system, 1401
Ta-Zr system, 1245
Ti-Cr system, 1342
Ti-V-Cr system, 743
W-Hf system, 264
Y-Zn system, 910
Zn-S-O system, 1419
of Zn-V system, 485

PHOSPHORUS

removal of, in direct reduction of iron ore, 136

PLATINUM

liquid, surface energy of, 1175

PLATINUM ALLOYS

Pt-Ag, metastable solid solutions in, 1253

PLUTONIUM

nitrate, solvent extraction of, 191

POINT DEFECTS

effect of, in flotation, 306
Generation of
in cold working, 365
Interstitials
activity of, theoretical expression for, 1116
Vacancies
formation of, in Cb during deformation, 678
interaction of, with G.P. zones, 1122
lifetime of, in ferrite, 950

POWDER METALLURGY

pressure bonding of Cu, 250
sintering, gravitational effects in, 640

PRECIPITATION

in Al-Mg alloys, 1122
of carbides in 304 stainless, 422
of carbides during tempering, 1334
Discontinuous
in ferrite, mechanisms of, 1411
of Ni_3Ti in Fe-Ni-Ti alloy, 754
effect of electric current on, 615
in Fe-Ni martensites during aging, 1426
Mechanism of
in Al-Ag alloy, 308
nonuniform, effect on fatigue, 452
stress oriented, in Ti-H system, 1166
of VN in liquid Fe-V alloys, 929

PREFERRED ORIENTATION (See TEXTURE)

PRESSURE

deformation due to, in Bi, 167
effect of, on Fe-C phase diagram, 429

PRESSURE BONDING

of Cu, 250
void formation during, 7

PROPORTIONAL LIMIT

in torsion of single crystals, 331
in torsion of single crystals, 340

PYROMETRY (See TEMPERATURE MEASUREMENT)

QUENCH AGING (See AGING)

RECOVERY

in Cu-Al and Cu-Zn, 1290
during creep, effect of stress on, 1314
of Fe, effect of interstitial impurities on, 1433

RECRYSTALLIZATION

of Au-Ag alloy after explosive loading, 1468
boundary migration in, mechanism of, 768
of Cr and Cr with interstitials, 724
of Cr, embrittlement during, 151
of Fe, effect of interstitial impurities on, 1433
grain boundary migration during, 699
of Ta alloys, temperature of, 856
of U, effect of, on microstructure, 1151

REDUCTION

of Ag_2S by H_2, 539
of Fe_2O_3 by H_2, 897
of iron oxide, rate of, 290
of $MoCl_5$ to Mo, 32
of reactive metal halides, 821
of reactive metal oxides, 821

REFINING

Of Pb
Cu removal from liquid Pb using doped PbS, 1275
of Zn, 509

REFRACTORIES

MgO, wettability of, by Fe, 1109
periclase, factors affecting microstructures of, 971
wear of, in Cu converters, 1229

REPLICAS

use of, in studying precipitation, 422

RESIDUAL STRESS (See STRESS, RESIDUAL)

RESISTANCE, ELECTRICAL

antiphase domain size related to, 260
of Cu_3Au, changes of, during annealing, 985
of liquid Bi-Sn alloys, 1156
of Ni-Cr-Fe alloys, temperature coefficient of, 586
Temperature coefficient of
correlation with conductivity, 60

REVERSION

in Al-Zn, effect of, on superconducting properties, 1209
during fatigue of Al alloy, 1093

RHENIUM

liquid, surface energy of, 1175

RHODIUM

liquid, surface energy of, 1175

ROASTING

fluid bed, of Zn concentrates, 105
rate equation for, 203
of Zn concentrates, 1419

RUTHENIUM

liquid, surface energy of, 1175

SCANDIUM

extraction of, from thiocyanate solutions, 124

SCANDIUM ALLOYS

Sc-Y system, phase diagram of, 865
Sc-Zr system, phase diagram of, 865

SEGREGATION

during cellular solidification, 374
during solidification of Sn-Pb alloy, 1351
Grain boundary
in Cr, during recrystallization, 145
of Tl in Sn, 223
of H in Al alloys, 438
of O to dislocations in Ta-O, 603
of solute, in solidification of dilute binary alloys, 112
of solute during solidification, in Sn-Ag alloys, 231
due to temperature gradient, 102

SENSITIZATION

of 304 stainless steel, 422

SILICON

activity of, in liquid Fe-Si-C alloys, 473
atomic radius of, in ternary Laves phases, 991
contamination of AgMg by, 793
deoxidation power of, 560
distribution of, between Fe-Si-C alloys and SiO_2-CaO-MgO-Al_2O_3 slags, 1193
effect of, on ductile-brittle transition in steel, 1212
nitride, solubility of, in liquid Ag, 1143

SILICON ALLOYS

Fe-Si-C, liquid, Si activity in, 1258
Fe-Si-C, liquid, Si diffusivity in, 1265
Si-Ag, liquid, Si and Ag activities in, 1143
Si-Ag, phase diagram, 1000
transition element silicides, ternary, 575

SILICON IRON

hysteresis loss in, 356
N solubility and activity in, 1393
recrystallization texture in, 1011
secondary recrystallization rate, 185
texture of, 905
texture development in, 776

SILVER

activity of, in Ag_2S during reduction by H_2, 539
Chloride
flotation of, 306
point defects in, 306
liquid, Si_3N_4 solubility in, 1143
sulfide, Ag activity in, during reduction by H_2, 539
surface diffusion coefficient of, on Ag, 99
surface energy vs. orientation of, 1078

SILVER ALLOYS

Ag-Al, creep of intermediate phase in, 1061
Ag-Au, annealing kinetics after explosive loading, 1468
Ag-Au, surface effects during interdiffusion in, 778
Ag-Ho, phase diagram of, 1302
Ag-Mg, Si contamination of AgMg, 793
Ag-Mg, tensile properties of AgMg, 769
Ag-Pt, metastable solid solutions in, 1253
Ag-S system, liquid, electrical conductivity of, 1034
Ag-Si, liquid, Ag and Si activities in, 1143
Ag-Si, phase diagram, 1000
Ag-Zn, deformation of crystals of, 84

SINTERING

gravitational effects in, 640
of plasma-sprayed W, 598

SLAG

Aluminate
Mn distribution between, and C saturated Fe, 1039
basic open-hearth, water solubility in, 1457
CaO-SiO_2-Al_2O_3, structure and transport properties of, 534
equilibrium of, with metal, 525
Silicate
Mn distribution between, and C saturated Fe, 1039
ternary, calculation of activities in, 207
water solubility in, 492
SiO_2 activity in BaO-CaO-SiO_2 slag, 1258
SiO_2 solubility in FeO-SiO_2 system, 270
sulfurization and desulfurization kinetics of oxide melts, 940

SLAG-METAL REACTIONS

Si distribution between Fe-Si-C alloys and SiO_2-CaO-MgO-Al_2O_3 slags, 1193
SiO_2 reduction from slag by C saturated Fe, kinetics of, 1265

SLIP

in Bi, under high pressure, 167
in Fe-Ni-C martensites, 159
prismatic, of Ag-Al intermediate phase, 1061

SLIP LINES

in Cu-Al, during easy glide, 257
intersecting, strain fields around, 797
spacing of, effect of surface removal on, 1003

SODIUM

activity and diffusivity of, in nongraphitic C, 1328
vapor, deposition of, on CsCl, 248

SOLIDIFICATION

cellular, segregation during, 374
cellular, of Sn-Pb alloy, 1351
cracking during, 2
distribution of solute during, 231
Eutectic
  interface morphology formed during, 64
  microstructure produced during, 393
monotectic, in Bi-Se system, 18
nucleation rate in, effect of stirring on, 890
rapid, of Ag-Pt alloys, 1253
rapid, apparatus for, 362
rapid, of Co-Au and Co-Cu alloys, 965
segregation during, of Sn-Pb alloy, 1351
of Sn, texture formed during, 1453
solute distribution during, 112
substructure formed during, in Ni and NiAg alloy, 1282
substructure formed during, in Zn-Au alloy, 276
texture formed during, 47
of Zn, texture formed during, 1453

SOLUBILITY

of C in Co-Ni alloys, 1029
of C in Ta, 1458
of Fe_3C in austenite, 429
of graphite in liquid Fe-Si-Mn alloys, 536
of H in liquid Co, Cr, Cu, and Ni, 285
of H in liquid Fe alloys, 382
of Ho in Cu, Ag, and Au, 1302
of Li in Al, 1204
limits of, nonequilibrium, 362
of N in liquid Fe alloys, 189
of N in liquid Fe alloys, kinetics of, 844
of N in liquid Fe-V alloys, 929
of N in silicon-iron, 1393
of Si_3N_4 in liquid Ag, 1143
of SiO_2 in FeO-SiO_2 system, 270
solid, metastable, in Ag-Pt alloys, 1253
solid, prediction of, 717
of water in open-hearth slags, 1457
of water in silicate melts, 492
of VN in liquid Fe-V alloys, 929

SOLUTION

kinetics of, in Al liquid, 179

SOLUTION HARDENING

of Cb alloys, 459
of Ni-Al_2O_3 composite with Mn, 1251

SOLUTION THEORY

Solid
  interstitial, 1116

SOLVENT EXTRACTION

of plutonium nitrate, 191
of transition metals, 124
of uranium nitrate, 191

SPECIMEN SIZE EFFECT

on Cr tensile properties, 151
in fracture of Zn crystals, 1069
in plastic flow of FCC crystals, 1003

SPRAYING

plasma, of W, 598

STACKING FAULTS

Frequency of
  texture transition correlation with, 627

STAINLESS STEEL

austenitic, cube texture in, 1454
deoxidation of, thermodynamic model for, 1380
fatigue of, effect of environment on, 1296
oxidation of, catastrophic, 346
sensitization in type 304, 422

STEEL (See also **IRON ALLOYS**)

bainite growth kinetics in, 651
Bauschinger effect in strain aged, 736
decarburization of, in wet H_2, 695
deoxidation of, 560

STEEL

ductile-brittle transition, effect of grain size and composition on, 1212
explosive ausforming of, 1188
Hardening
  effect of, on X-ray line broadening, 447
H diffusion in, theory of, 618
H embrittlement of, 269
martensite strengthening mechanism in, 1080
plastic anisotropy of, 272
shock hardening of, 1188
tempering of, microstructural changes during, 1334
X-ray line broadening in, 447

STORED ENERGY (See **ENERGY, STORED**)

STRAIN AGING

Bauschinger effect influenced by, 736
dislocation unpinning, 658
of Ta-O alloy, 603

STRAIN HARDENING (See also **COLD WORK**)

of Ag-Zn single crystals, 84
of Cb, mechanisms of, 678
of Co crystals, 762
of Cu_3Au, ordered, 260
easy glide, cross-slip in, 835
effect on Petch slope of, 239
of FCC crystals, effect of surface removal on, 1003
mechanisms of, in Al and Al-Mg alloys, 1015
of MgO crystals, 1103
slip line structure in, in easy glide region, 257
surface condition effect on, 529
temperature dependence of, in Fe base alloys, 1369
of two-phase W-Ni-Fe composites, 1127

STRAIN, PLASTIC

Effect of
on electrical resistivity of Cu_3Au, 260
on Petch slope, 239

STRESS

Critical resolved shear
of Co, 762
Effect of
on activation energy for creep, 22
on creep rate, 351
on creep rate, 1474
on precipitate orientation in Ti-H system, 1166
fracture, of Zn crystals, 1069
Residual
magnetic hysteresis loss affected by, 356
magnetostriction affected by, 359
after peening, 447
after plastic elongation, 356
after plastic elongation, 359
Yield
of Ta and Ta-W alloy, grain size dependence of, 772

STRESS-RUPTURE PROPERTIES

of Cb alloys, 459
of N:, effect of prior strain on, 868
of René 41 type alloys, 405

SUBGRAIN BOUNDARIES

migration of, in Ni and Ni-Ag alloy, 1282

SUBGRAIN SIZE

in Ni and Ni-Ag alloy after solidification, 1282

SUBLIMATION

of $MoCl_5$, 32

SULFUR

activity of, in Cu-Ni-S mattes, 980

SULFURIZATION

kinetics of, of oxide melts, 940

SUPERCONDUCTING PROPERTIES

of Al-Zn alloys, effect of clustering on, 1209
Transition temperature
of V_3Co, effect of substituting Ni or Rh for Co on, 1407

SURFACE CONDITION

Effect of
on mechanical properties, 529
on plastic flow of FCC crystals, 1003
on pressure bonding, 250
on yielding of Pe, 669

SURFACE ENERGY (See ENERGY, SURFACE)

SURFACES

Diffusion on
in Cu, 515
mechanism of, 784
topography of, in Kirkendall experiment on Ag-Au system, 778
vapor deposition on, 248

SURFACE TENSION (See ENERGY, SURFACE)

TANTALUM

Carbide
physical and mechanical properties of, 1361
liquid, surface energy of, 1175
mechanical properties of, 131
yield stress of, grain size dependence of, 772

TANTALUM ALLOYS

fabricability of, 856
mechanical properties of, 856
recrystallization temperature of, 856
Ta-C, C solubility in, 1458
Ta-C, physical and mechanical properties of fcc phase in, 1361
Ta-Ir, phase diagram of, 1401
Ta-O, strain aging of, 603
Ta-Pd, intermediate phases in, 1028
Ta-W, grain size dependence of yield stress in, 772
Ta-Zr, phase diagram of, 1245
weldability of, 856

TEMPERATURE MEASUREMENT

of liquid Fe, 482
by optical pyrometer, 482

TEMPERING

kinetics of, 94
microstructural changes during; in 0.4%C steel, 1334

TEXTURE

annealing, of Cu, 627
in austenitic stainless steel, 1454
characterization of, 934
cube-on-edge, in Fe-Si, development of, 776
determination of, using spherical specimen, 1011
of Fe-Si, rolling and annealing, 905
in Fe-Si, secondary, 185
of low C steel, relation of, to plastic anisotropy, 272
prediction of physical properties from, 934
recrystallization, of Fe crystal, 1011
recrystallization, of Fe-Si alloys, 1011
rolling, of Cu, transition of, 627
solidification, of Pb, 47
of Sn after casting, 1453
of Zn after casting, 1453

TENSILE PROPERTIES

of AgMg, 769
of Al-Mg alloy, 452
of Cb alloys, 459
of Cd and Cd-Mg alloys, 70
of Cr, recrystallized, 151
of Ni-Al_2O_3 composite, effect of Mn on, 1251
of Ni films, 1346
of René 41 type alloys, 405
of shock hardened and explosively ausformed alloy steel, 1188
of Ta alloys, hot, 856
of Ti-Al-Zr alloys, 563
of Ti-V-Cr-Al alloys, 743
of W-Ni-Fe composites, 1127

THERMAL EXPANSION

Coefficient of
of Hg alloys, 51
of liquid Cu, 1226
prediction of, in textured materials, 934

THERMOCOUPLE MATERIALS

thermoelectric power of, 478

THERMOELECTRIC PROPERTIES

of transition thermoelements, 478

THIN FILMS

of Be, preparation of, 1462
of Ni, strength of, 1346

TIN

solidification of, nucleation rate, 890
solidification texture in, 1453

TIN ALLOYS

grain boundary segregation of Tl in, 223
segregation in, during solidification, 112
Sn-Ag, solute distribution during solidification of, 231
Sn-Bi, liquid, electromigration and resistivity in, 1156
Sn-Pb, segregation in, during solidification, 1351
Sn-Pb, solidification of, 374
Sn-Pb, solidification of, nucleation rate, 890

TITANIUM

hardness of, during recovery, 1024
internal friction of, 1024
liquid, surface energy of, 1175
oxide, (rutile), hardness of, effect of stoichiometry on, 1467
spurious transformation in, 789

TITANIUM ALLOYS

Ti-Al-Zr system, mechanical properties of, 563
Ti-Cr, phase diagram of, 1342
Ti_2Cu, crystal structure of, 674
Ti_4Cu_2O, crystal structure of, 674
Ti-H, stress orientation of precipitates in, 1166
Ti_2Ni, crystal structure of, 674
Ti_4Ni_2O, crystal structure of, 674
Ti-O-H, thermodynamic properties of, 769
Ti-V-Cr phase diagram, 743
Ti-V-Cr-Al system, tensile properties and aging of, 743

TORQUES

Surface
of Ag, 1078
of solids, 400

TORSION

Bauschinger effect in steel during, 736
stored energy produced by, 365
stored energy produced by, 1477
yielding in, 331
yielding in, 340

TRANSITION PRESSURE

of Fe-Si alloys, 746

TRANSITION TEMPERATURE

Ductile-brittle
of Cb alloys, 459
in Cb, effect of O_2 and H_2 on, 131
of Cd and Cd-Mg alloys, 70
of Cr and Cr with interstitials, 724
effect of grain size and composition on, in steel, 1212
in Fe-W, 505
of recrystallized Cr, 151
in Ta, effect of O_2 and H_2 on, 131
in W, effect of grain size on, 280

TUNGSTEN

carbide-Co alloys, sintered, fracture strength of, 1146
ductility of, effect of annealing on, 280
liquid, surface energy of, 1175
plasma-sprayed, sintering of, 598

TUNGSTEN ALLOYS

W-Hf, phase diagram of, 264
W-Ni-Fe composites, mechanical properties of, 1127

TWINNING

in Bi, absence of, at high pressure, 167
in Cb, effect of interstitials on, 1170
effect of grain size on, 505
electron diffraction patterns after, indexing of, 1044
in Fe base martensites, modes of, 1471
in Fe-Be alloy, 779
in Fe-Ni-C martensites, 159
in Fe-Si alloys during shock loading, 746
in sapphire, 1053
of Zr, shear during, 976

TWINS

in Al, with planar boundaries, 786
intersections of, in bcc crystals, 775

URANIUM

carbide, etch pits in, 286
carbide, oxidation of, 488
diffusion coefficient of, in liquid Cd, 571
microstructure of, after cold work and recrystallization, 1151
nitrate, solvent extraction of, 191
self-diffusion coefficient of, in γ phase, 265

URANIUM ALLOYS

U-Nb system, diffusion in, 1083

VACANCIES (See POINT DEFECTS)

VANADIUM

liquid, surface energy of, 1175
nitride, precipitation of, in liquid Fe-V alloys, 929

VANADIUM ALLOYS

ternary Cr_3O-type phases in, 1407
V-Mn, CsCl-type structure in VMn, 1460
V-Zn system, phase diagram of, 485
V-Zr-Co, structure of $Zr(VCo)_2$, 687

VISCOSITY

of Bi, 706
of Pb, 706
of Zn, 706

VOIDS

in CO_2 at grain boundaries, 1134
formation of, during solidification, 580
interfacial, 7

WATER

solubility of, in open-hearth slags, 1457
solubility in silicate melts, 492

WELDABILITY

of Ta alloys, 856
of Ti-Al-Zr alloys, 563

WELDING

cracking during, 2
cracking during, in René 41 type alloys, 405

WORK HARDENING (See STRAIN HARDENING)

X-RAY LINE BROADENING

in PbTe after cold work, 282
in steel, 447

X-RAY TECHNIQUES

extinction contrast, use of, in study of slip plane intersections, 797
liquidus determination in binary phase diagrams, 535
orientation determination, using cylindrical Laue photograph, 712
texture determination using spherical specimen, 1011

YIELDING

of Au and Al crystals, 1003
of Be, effect of surface condition on, 669
Cottrell's theory, effect of line tension in, 658
of Cu_3Au, ordered, 260
Petch relation, 239
of Ta and Ta-W alloy, grain size dependence of, 772
in torsion of single crystals, 331
in torsion of single crystals, 340

YYTRIUM ALLOYS

Y-Sc, phase diagram of, 865
Y-Zn phase diagram, 910

ZINC

cleavage of crystals of, 1069
creep of single crystals of, 529
crystals, effect of surface removal on plastic flow of, 1003
dislocation structure of, 994
refining of, 509
roasting of concentrates of, 1419
roasting practice, fluid bed, 105
solidification texture in, 1453
sulfates, anhydrous, thermodynamic properties of, 1419
sulfide, oxidation of, 215
viscosity of, 706

ZINC ALLOYS

segregation in, during solidification, 112
Zn-Au, solidification substructure in, 276
Zn-S-O, phase diagram of, 1419
Zn-V system, phase diagram of, 485
Zn-Y phase diagram, 910

ZIRCONIUM

carbide, oxidation kinetics of, 467
diffusion coefficient of Cb in, 592
liquid, surface energy of, 1175
oxidation of, kinetics of, 1184
self-diffusion coefficient in, 592
tetrachloride, fused-salt scrubbing of, 773
twinning elements in, 976

ZIRCONIUM ALLOYS

dispersion hardening of, 1463
Zircaloy-2, H thermal diffusion in, 917
Zr-Sc system, phase diagram of, 865
Zr-Ta, phase diagram of, 1245
Zr-V-Co, structure of $Zr(VCo)_2$, 687

ZONE REFINING

levitation apparatus for, 960
of $MoCl_5$, 32
